GIS Analyst Position

Immediate Position Available

Ecofish Research Ltd is an environmental consulting firm based in the Comox Valley on Vancouver Island. We specialize in the evaluation and management of impacts to aquatic, riparian, and terrestrial ecosystems. We have an immediate employment opportunity for a GIS Analyst to work with our team of biologists, hydrologists, chemists, and environmental technicians.

The successful candidate will have a minimum of three years of experience providing cartographic products and creating and managing spatial data. The candidate will have proven skills using ESRI ArcGIS 9.x suite of products and extensions. The candidate will also be proficient in analyzing and modeling spatial data. The candidate will have experience working with imagery and CAD drawings as well as strong knowledge of geographic coordinate systems and transformation methods. The candidate will have the ability to utilize scripting or programming languages such as VBA, Python or other. Good oral and written communication skills are an asset.

Interested applicants can send a resume and cover letter that clearly identifies their experience to info@ecofishresearch.com. Applications will be accepted until noon November 30, 2009. Only those applicants that are selected for an interview will be contacted.
