

THE CITY OF YELLOWKNIFE

Geomatics Officer

Under the general direction of the Manager, Information Technology, the Geomatics Officer is responsible for providing geomatics services to all departments within the City of Yellowknife by producing cartographic products, creating and maintaining spatial data, ensuring data integrity, and participating in a wide variety of cross-departmental projects. This position is also responsible for the on-going maintenance of the enterprise Geographic Information System (GIS). This position works closely with the Information Technology Spatial Analyst to provide a high caliber of customer service.

This position requires the incumbent to have a university degree or technology diploma in a relevant discipline (i.e. Geography, GIS, Environmental Science, or Engineering). The knowledge required to perform the position is usually gained by having a minimum of three years of related experience and the ability to perform in the following areas:

- developing cartographic and data products using ArcGIS Desktop;
- working with relational and spatial databases (i.e. ArcSDE, Microsoft SQL Server), and SQL language scripting;
- working with ArcGIS Server administration and the Geocortex Essentials web mapping application;
- using GPS for data collection (Trimble/Leica);
- experience with AutoCAD Map 3D and AutoCAD Civil 3D;
- using FME for data manipulation and conversion;

The City of Yellowknife offers a competitive salary range plus a comprehensive benefits package which includes a defined benefit pension plan. For further information or clarification of the job description, please contact Human Resources at 920-5603. Submit resumes in confidence no later than May 2, 2014, to:
