Historical Perspective

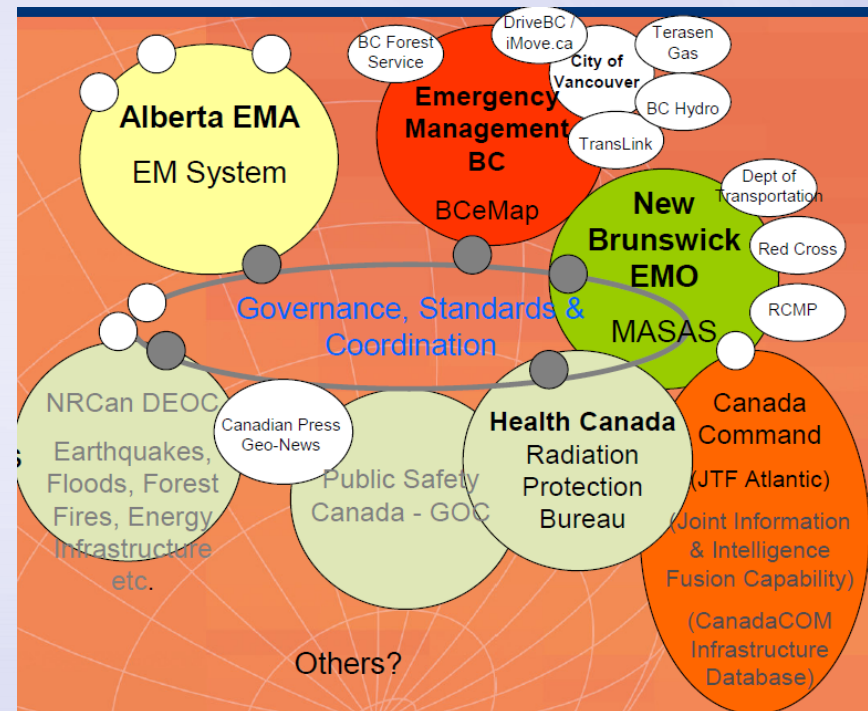

- ❖ **Shifting focus of GIS from Emergency Response to Preparedness**
- ❖ **Increase in frequency of Emergency Events & Expansion of GIS needs**
 - ❖ **Forest Fires**
 - ❖ **Flooding , Search and Rescue**
 - ❖ **Oil Spills, Avian Influenza**
 - ❖ **2010 Olympics**
- ❖ **Change in types of GIS Services**
 - ❖ **Hard Copy Maps**
 - ❖ **Web Mapping application/tools**
 - ❖ **Dynamic Real Time Incident and Mapping Information that can be shared with Multiple Agencies**

Multi – Agency Situational Awareness System (MASAS)

MASAS: Systems of Systems

Within MASAS, each agency:

- Controls what they share
- Decides what information from other agencies is relevant to them
- Uses their existing systems to publish and consume

BCeMAP...

What is BCeMAP?

Multi – Agency Situational Awareness Tool

BCeMAP is Intended to Provide:

- Real time dissemination
- Common Operating Picture
- Access and dissemination
- Role Based

BCeMAP = A Geospatial Data Mashup

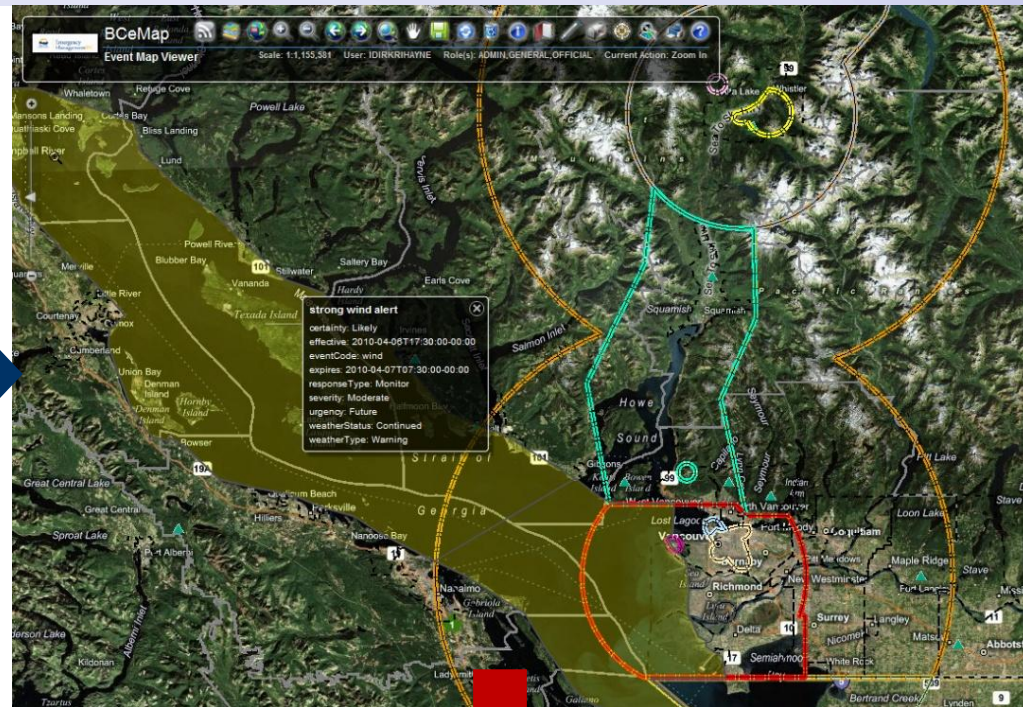

Viewing of Real Time Incident Info

Real Time Feeds (e.g. Weather)

Thematic Mapping Data & CI

Base Mapping Data

Funded through Geoconnections
Multi Agency Situational Awareness System (MASAS)

- Common Operational Picture
- Enhanced Situational Awareness
- Strategic Planning
- Operational Support
- Better Consequence Management

Use of Open Standards

Canadian Profile of the Common Alerting Protocol (CAP-CP)

Multi-Agency Situational Awareness (MASAS)

Emergency
ManagementBC

BCeMAP DEMO

Use Case: Large Scale Traffic Accident

Actor: Operations Section Chief

Responsibilities : Maintains situational awareness and shares key information with external agencies , internal staff and director

Task : Identify what may be at risk and notify key personnel

Scenario: Large Scale Traffic Accident

Richmond, BC—An 18-wheeler transporting 45,000 pounds of hydrochloric acid rolled over on hwy 99 near the Massey tunnel, which caused massive amounts of acid to be released into the air.

Richmond City Fire Department is stating that there is a large amount of hydrochloric acid spilling onto the hwy and into Massey tunnel from the tanker, and clouds of smoke can be seen from the scene. Two City police officers were overcome by the acidic fumes, and were rushed to a nearby hospital for treatment.

Summary Conceptual Integration

Challenges and Opportunities

- **Information/Data sharing**
 - **Data Agreements**
 - **Data maintenance and updating**
- **Dynamic feed integration**
- **Community of Practice**

Summary

- **Emergency management is all about coordination and interaction across organizational and jurisdictional boundaries**
- **Technology is a fundamental enabler, but there are significant costs**
- **Most challenges are people and process**
 - **Technology will fail if these issues aren't addressed**
