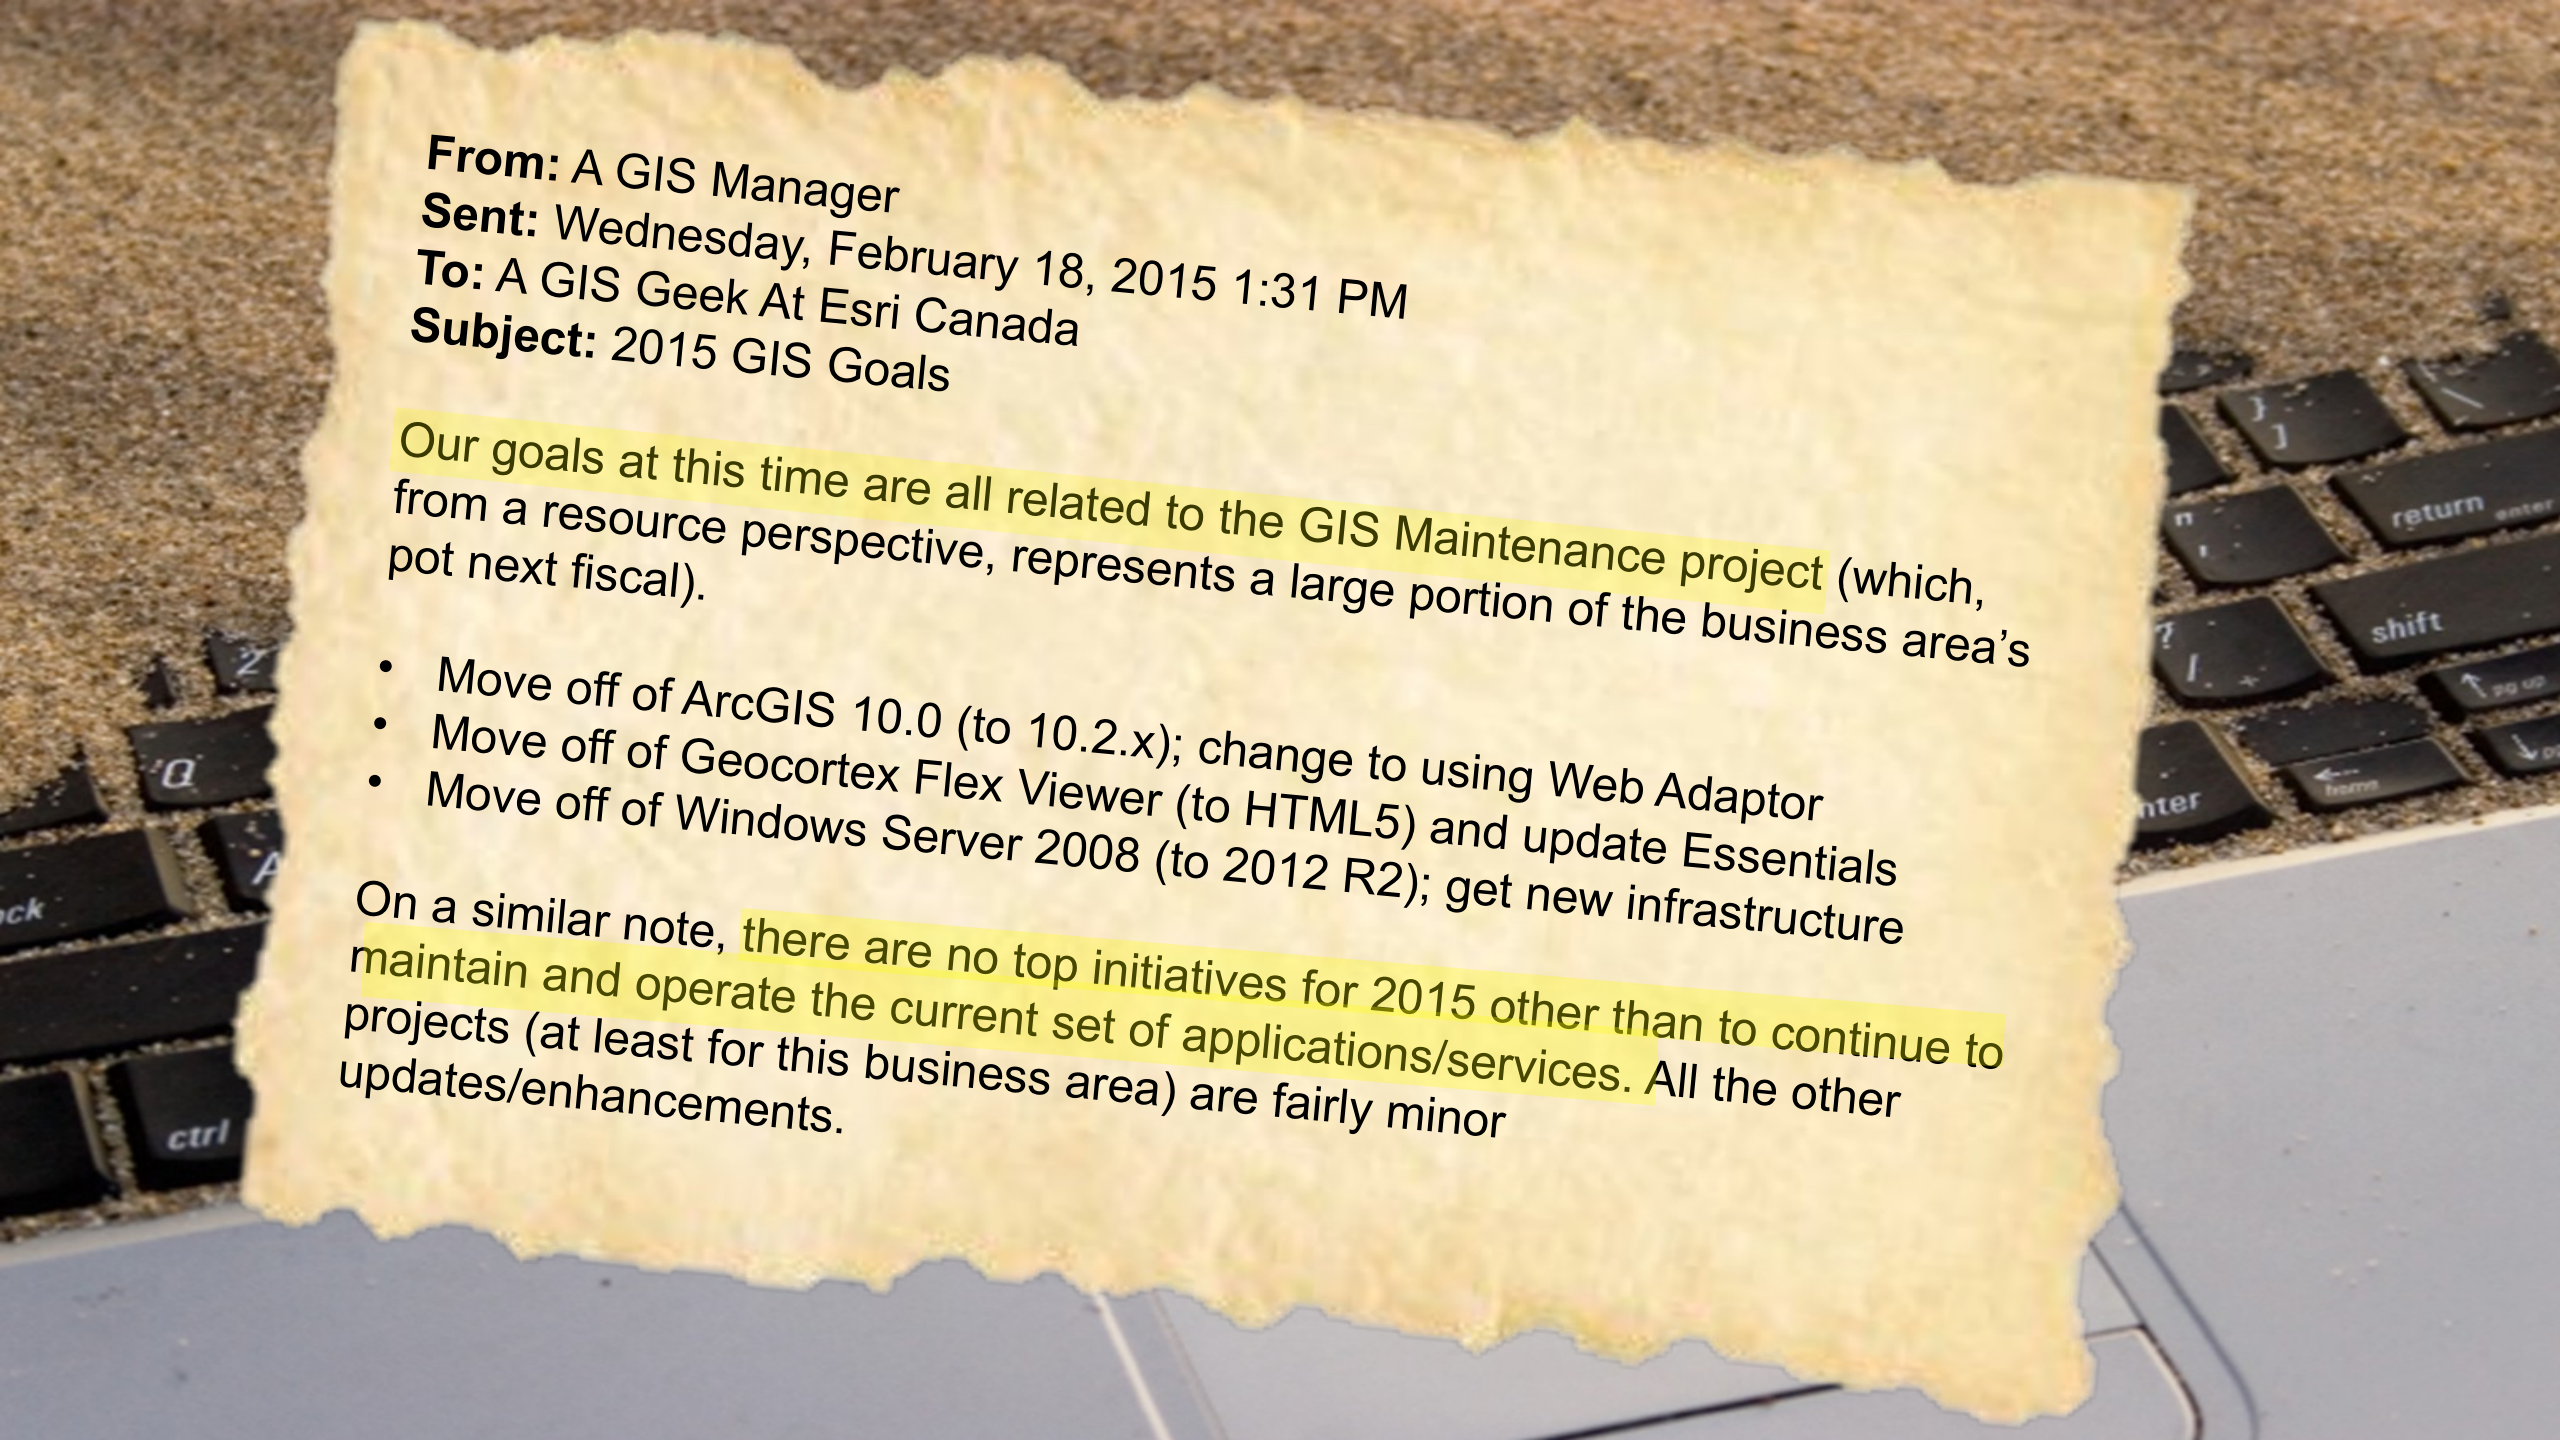
Stagnation



From: A GIS Manager
Sent: Wednesday, February 18, 2015 1:31 PM
To: A GIS Geek At Esri Canada
Subject: 2015 GIS Goals

Our goals at this time are all related to the GIS Maintenance project (which, from a resource perspective, represents a large portion of the business area's pot next fiscal).

- Move off of ArcGIS 10.0 (to 10.2.x); change to using Web Adaptor
- Move off of Geocortex Flex Viewer (to HTML5) and update Essentials
- Move off of Windows Server 2008 (to 2012 R2); get new infrastructure

On a similar note, there are no top initiatives for 2015 other than to continue to maintain and operate the current set of applications/services. All the other projects (at least for this business area) are fairly minor updates/enhancements.

YOU OK?

I SHOULD'VE TOLD YOU
I WAS STOPPING.
