City of Coquitlam

Custom Web Map Applications – A New Approach

Mike Esovolof

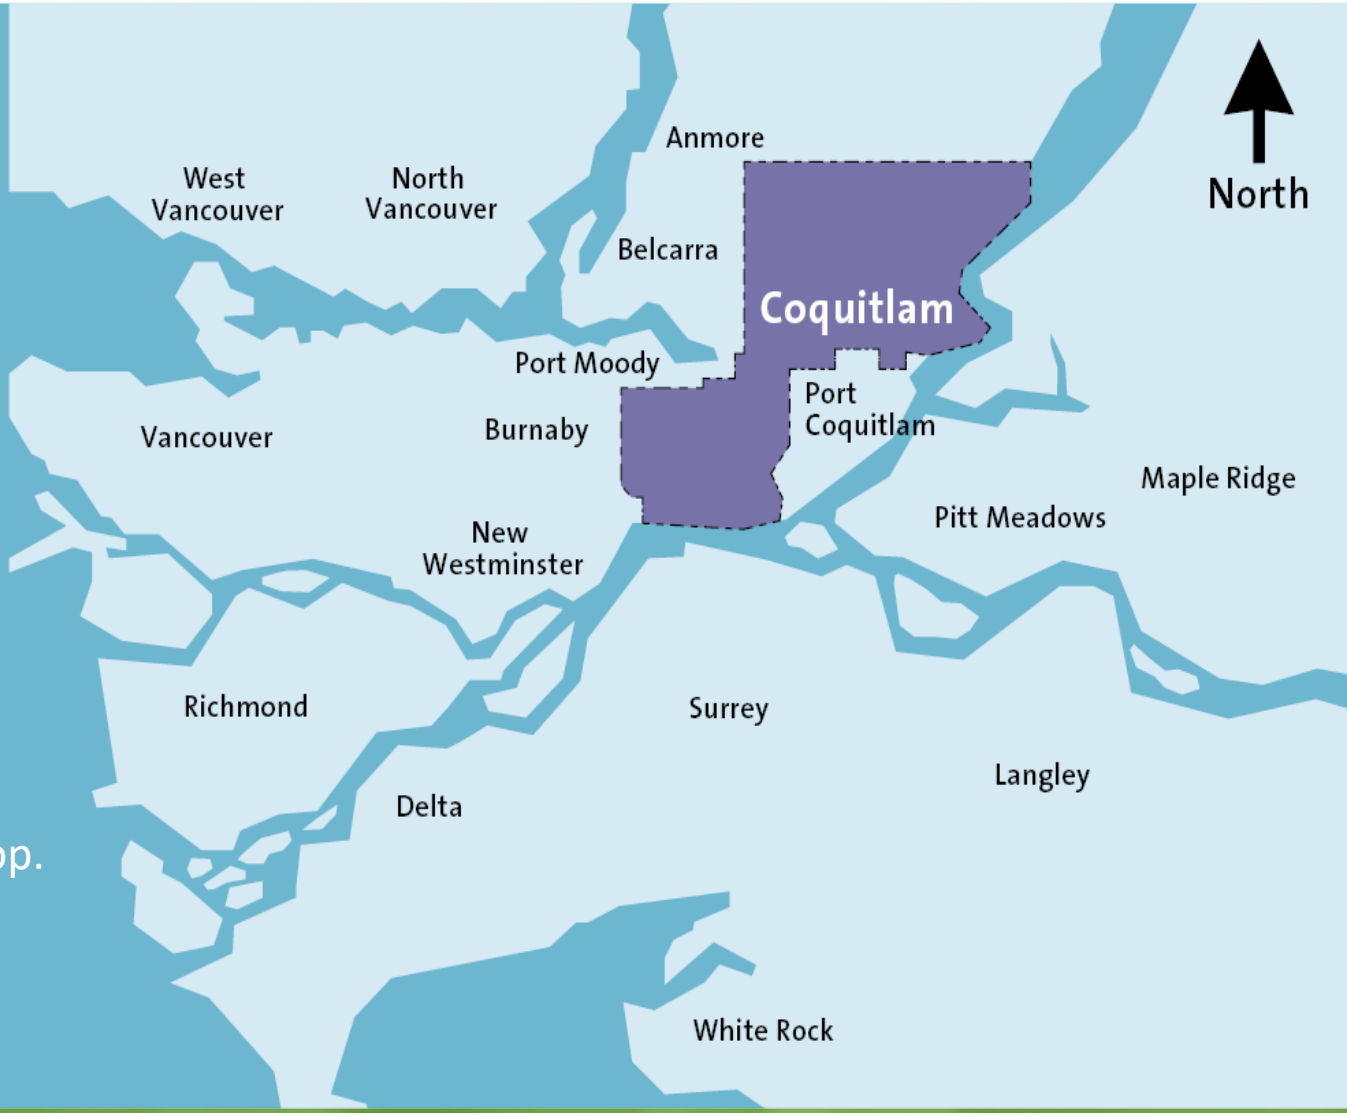
Supervisor Mapping & Drafing

Engineering & Public Works

December 6, 2016

Coquitlam

140,000 pop.



Background

Converted to Esri in 2001 (SLG ELA since 2010)

Inital reliance on paper based map products

All-in-one internal & public web applicatons since 2004 (QtheMap) - staf & public view and retrieve typical or standard municipal data

Custom maps requested to meet changing business needs

Mobile GIS (maps for field staff)

Improve processes, efciency and ease of access to up-to-date informaton

Spatal presentaton of informaton from other business applicaton systems

Enable beter decision making for long-range planning or day-to-day operatons

Inspiraton - It all changed when…

2014 Esri Internatonal User Conference

Introducton of ArcGIS Online, Web AppBuilder, Portal for ArcGIS

Opportunity to beter share informaton within the organizaton

A New Approach

One size does not ft all – customizaton of maps

Think spatally – majority of informaton is locaton based

Leverage the power of GIS to bring informaton together

Simplify complicated processes… and keep the simple things simple

Training & access for non-GIS staf to view, analyze & edit GIS data

Process and Communicaton

Installation and testing of the technology

Privacy Review

Thorough needs assessment included training and communication sessions with user groups

Rapid prototyping with continued communication
