# Key Aspects of PlanIt (v2) Development

- **Agile Methodology:**
  - Small Team of Subject Matter Experts (6)
  - Monthly Sprints focused on:
    - 60% Sprint Goal
    - 20% Value Add
    - 20% Bug Fix
- **Open Source Tools:**
  - Development
  - Project Task Management

Show Menu

## Rejected / Removed From Consideration

Provide some kind of tagging system

☰ 1

Quick Edit tool should be limited to bumping projects by weeks

☰

(21) Soft delete of projects

☰ 1

Split Eng - Transportation organization into Eng - Active Transportation and Eng - Strategic Transportation

☰

Conflicts should have a severity property so that some can be flagged

Add a card...

## Request

Quick edit tool should also work for street uses

☰ 1

Quick update should allow bumping dates backwards

☰ 1

Parent/child/related events

☰ 2

Get rid of warning when opening download results to Excel file

☰

Zoom between preset scales

☰ 1

Add pictures to project details

Add a card...

## Analysis / Review

Set project statuses to complete automatically after end date.

☰ 2

Improve map labelling

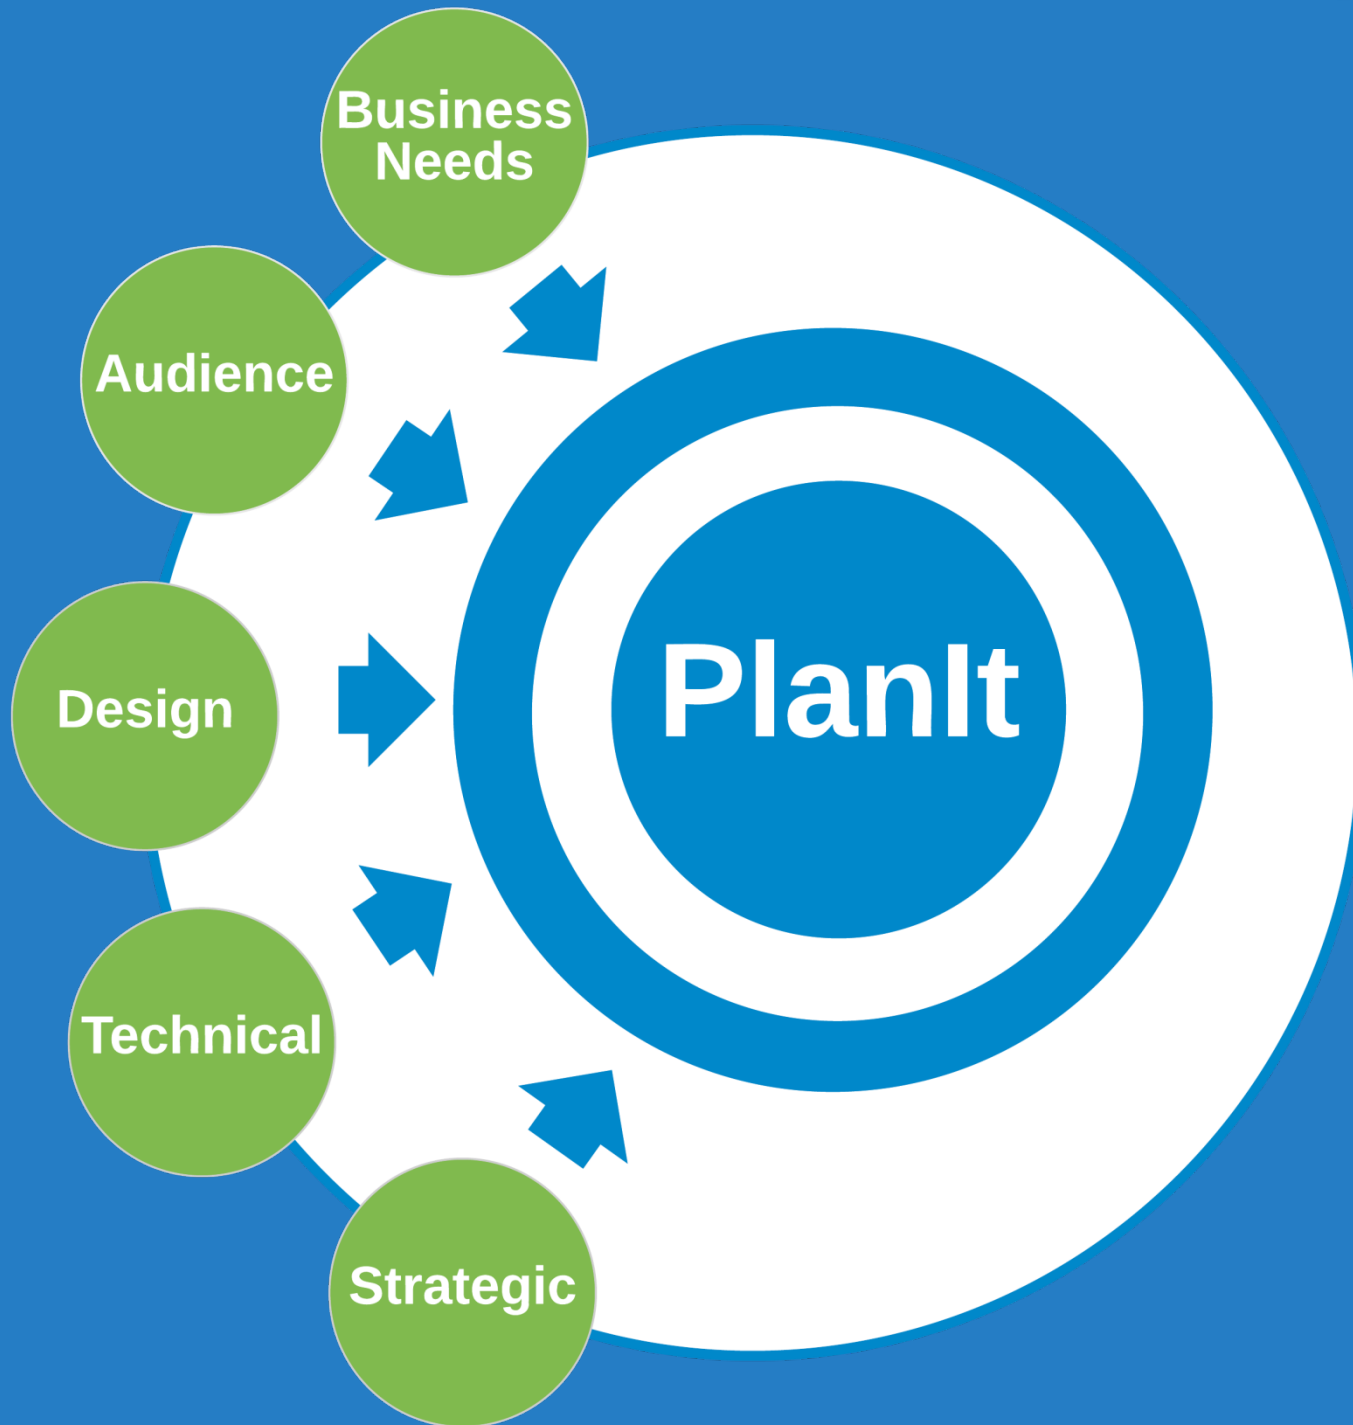

☰ 2

Add a card...

---

# What is PlanIt?

# Business Needs Driving Development

Event Conflict  
Detection Types  
(Over Time & Geometry)

Geometry Type  
Appropriate for  
Event Type

Many Data  
Sources  
(Internal & External)

# Audience Needs Driving Design

## Design Parameters based on Audience:

- Fast
- Flexible
- Maximize Screen Real Estate
- Minimal Scrolling
- Showing info differently to different users
- Features to Ease Data Entry
- Responsive Web Design

# User Interface Design

# Conflict Detection

## Street Use Details [Edit](#) | [Delete](#)

**i** This street use has at least one unresolved conflict. Please review the conflicts section below.

<b>Title</b>	BC Hydro Utility Construction at Campbell Avenue
<b>Schedule</b>	Nov 23, 2016 - Nov 30, 2016; Weekdays; 7:00 AM - 6:00 PM
<b>Event Type</b>	Roadwork - Utilities
<b>Description</b>	Traffic at both sides of Campbell Ave from E Hastings St to E Cordova St will be reduced to one lane in each direction from 7am to 6pm. Work also requires the closure of lane north of E Hastings St from Campbell Ave to Raymur Ave.
<b>Location Description</b>	Campbell Ave from E Hastings St to E Cordova St

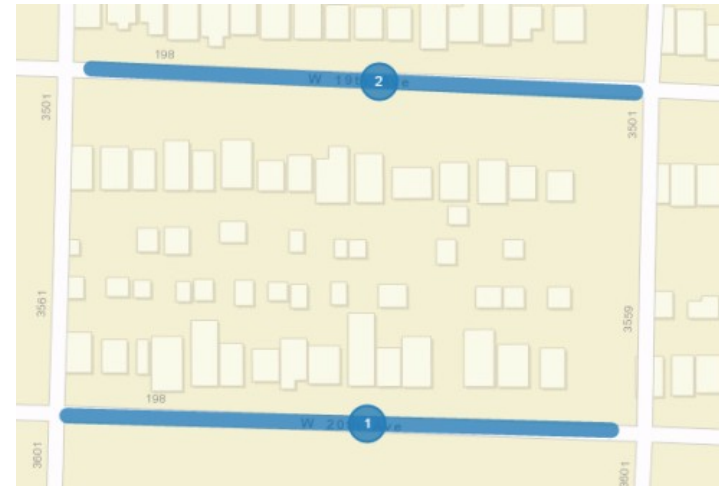

### Conflicts

*This street use has 1 unresolved and 0 resolved conflicts.*

Event Title	Explanation	Status	
<a href="#">Telus Utility Maintenance at Campbell Avenue</a>	Events intersect in space and time	Unresolved	<a href="#">Manage Conflict</a>

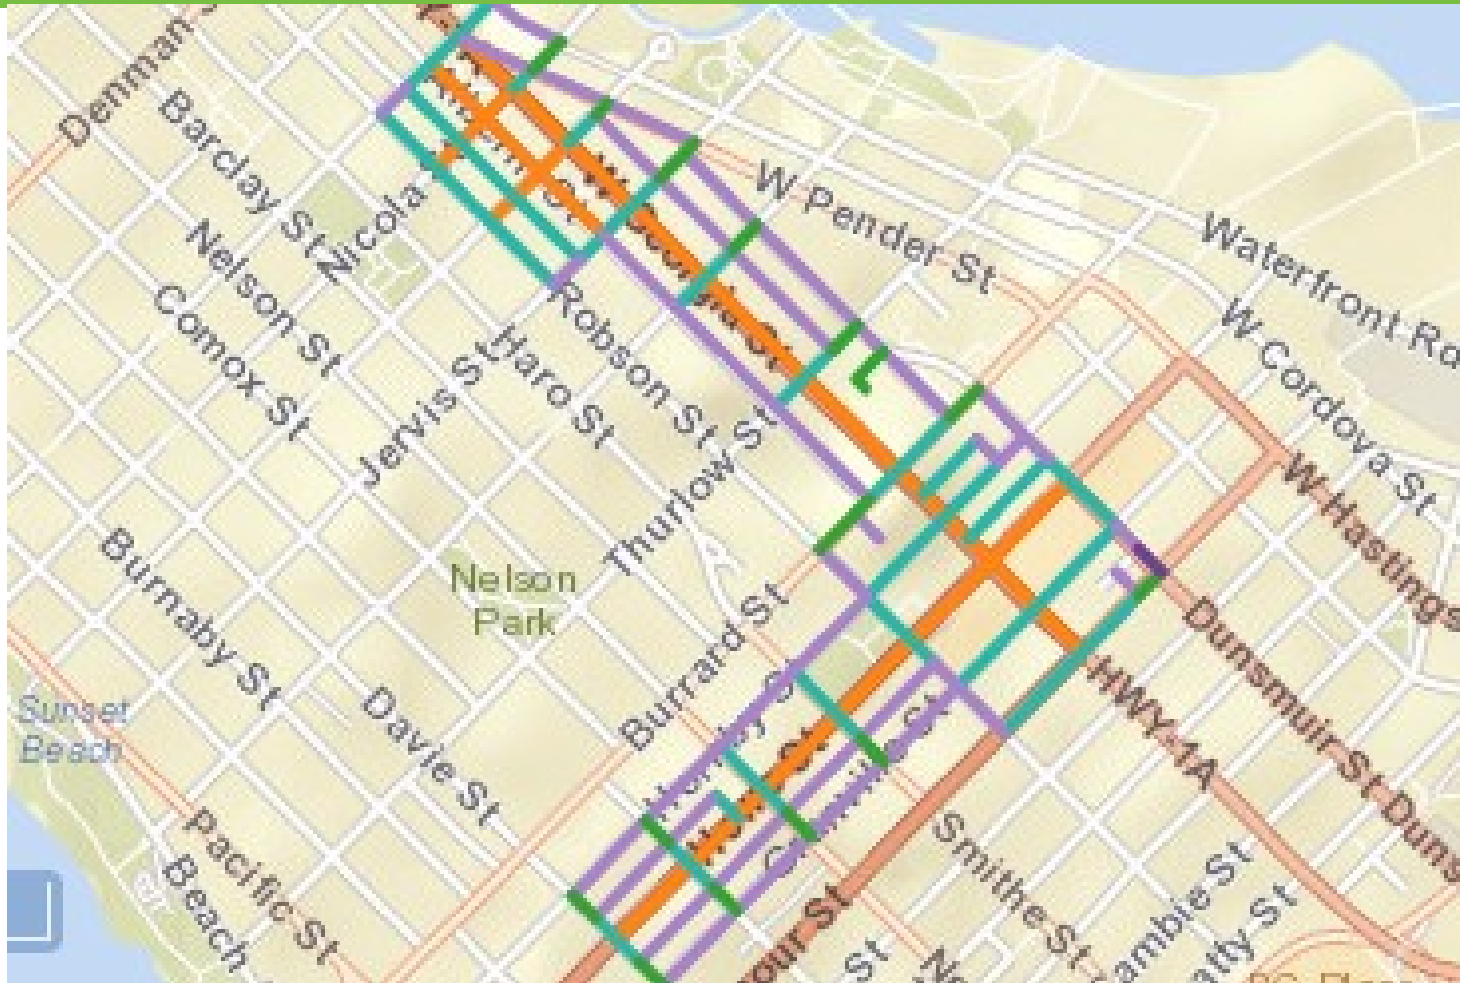

# Conflict Detection- Rules

# Conflict Detection – Street Reservation System

# Conflict Detection – e.g. Santa Claus Parade

- Event street/lane
- Parallel street/lane
- Perpendicular arterial

- Intersecting street/lane
- Parallel arterial

# Conflict Detection

## Challenges

- Performance
- Data integrity for topology

## Technical

# NetTopologySuite

QuickGraph, Graph Data Structures And Algorithms for .NET

# Strategic Integration

 OpenLayers 3

 BACKBONE.JS

Bootstrap CSS

Client

---

.NET (ASP.NET MVC) Plant Core Service

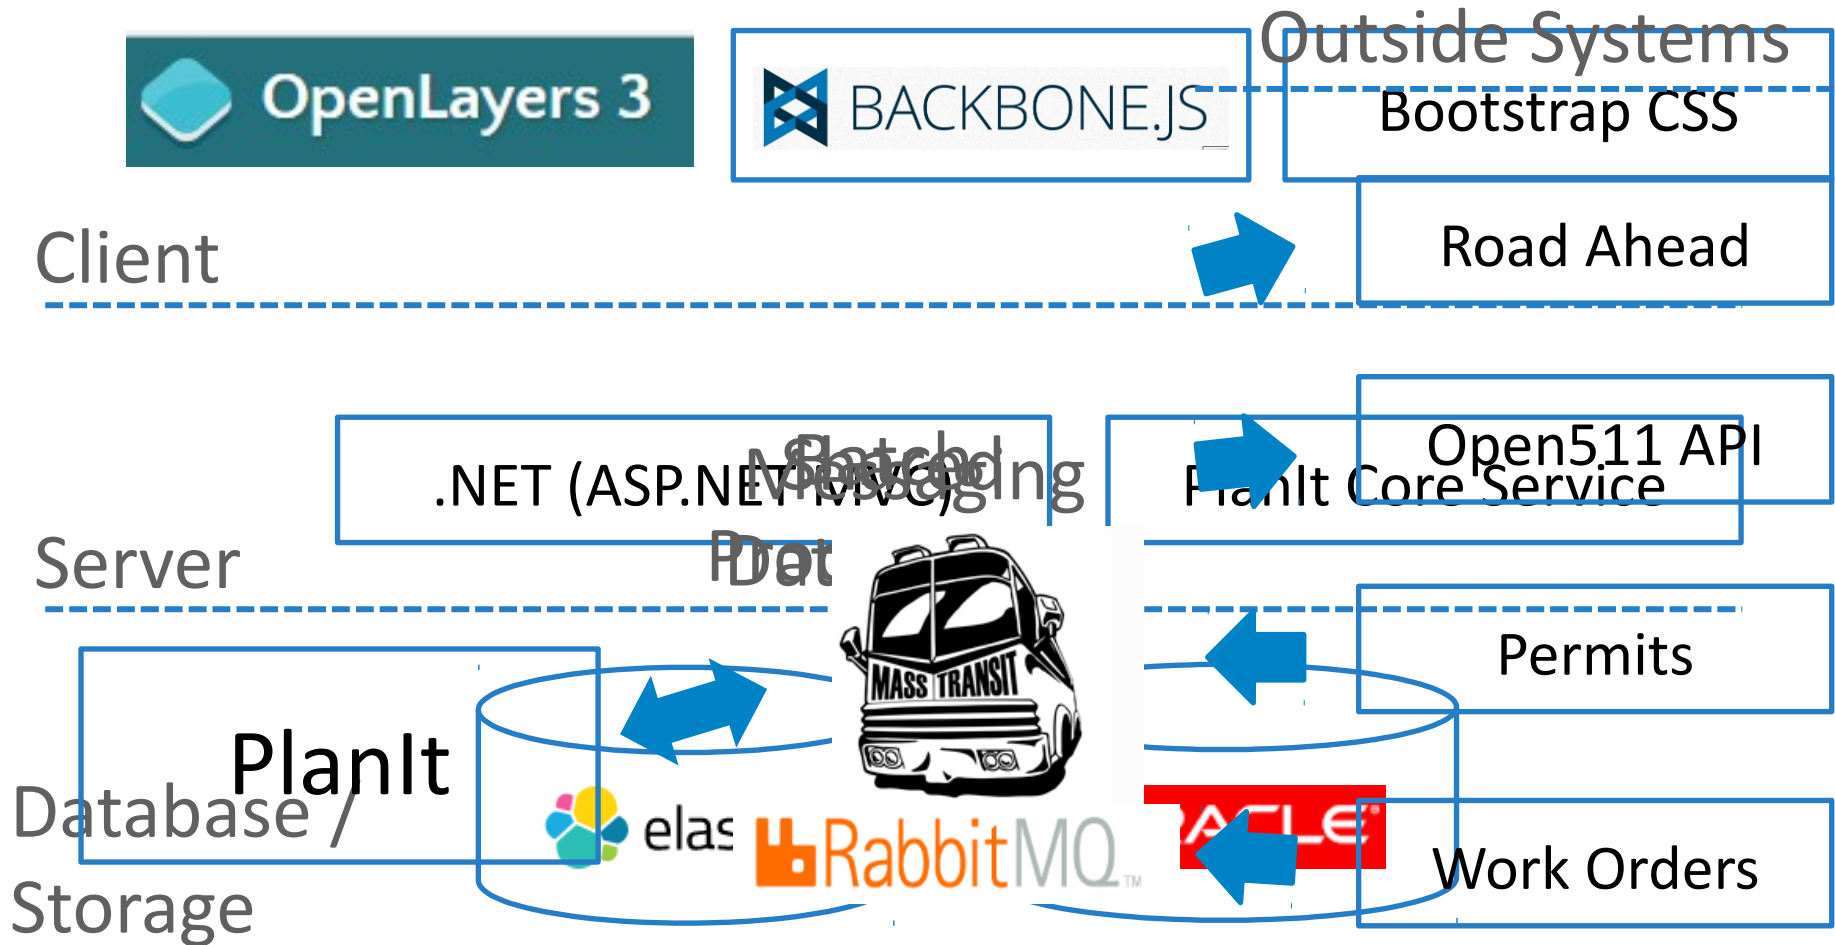

Server

---

Database /  
Storage

# Strategic Integration

# Lessons Learned

- Automated Unit Tests
- OpenLayers more flexible than Leaflet
- Conflict Detection – Topology
- Optimization
- Agile design enables users to be participants
- Longer & Complicated
- Visualization is key

# How has PlanIt enabled City of Vancouver?

- Source for ALL Construction Planning meetings
- Data entry & Update Tools for Planners & Project Coordinators
- Enabled the City to meet Open Data and Digital Strategy initiatives
- Encouraged other city departments to build integration capabilities PlanIt data into their displays/workflow roadmaps:
  - Vehicle GPS Driver Display
  - Parking Enforcement Display

# What Are we Working On (2017+)

- Long term capital planning details from Utilities
- Concept of “Street Construction Moratorium” on streets
- Publishing data to Open 511 API & Drive BC
