Moving GIS into the Enterprise

Welcome

Moving GIS into the Enterprise

- **Today's Seminar Format**
  - 5 presentations
    - 4 in the morning
    - Lunch - then 1 presentation after
  - Each presentation deals with one aspect of Enterprise GIS
  - Finish with a Panel Discussion – detailed talks with questions from the audience

Moving GIS into the Enterprise

- ***Looking Outwards***
  - Where do we *fit* within IT?
  - How does GIS *fit* into your organization?
  - Is the role of GIS changing?
  - What will be the corporate expectations of spatial-technology in the future?

Moving GIS into the Enterprise

- **Integration with Existing Applications**
  - Land Records
  - Permits and Licenses
  - Asset Management
  - Financial Systems
  - …or any place where the powers of spatial information can augment existing information

Moving GIS into the Enterprise

People
- skills
- training
- politics

Technology
- implementation
- integration

Processes
- streamlining

Data
- maintenance

Usability
- effectiveness

Moving GIS into the Enterprise

- **What is Enterprise GIS?**
  - Where GIS improves workflows and increases efficiency.
  - Easy to use – can *non-GIS* people use it?
  - Where GIS makes use of other corporate data sets.
  - Spirit of collaboration.

Moving GIS into the Enterprise

Are we there yet?
