  - Attribute Information
- Objective and Process
- Current Densities
- Projected Densities
  - Projected Single Family Development
  - Projected Townhouse Development
  - Projected Apartment Development
- Range of Population Growth
- RAV
  - Current and projected units and population

# Base GIS Data For Population Projection Model (Data Broken Down by Quarter Section)

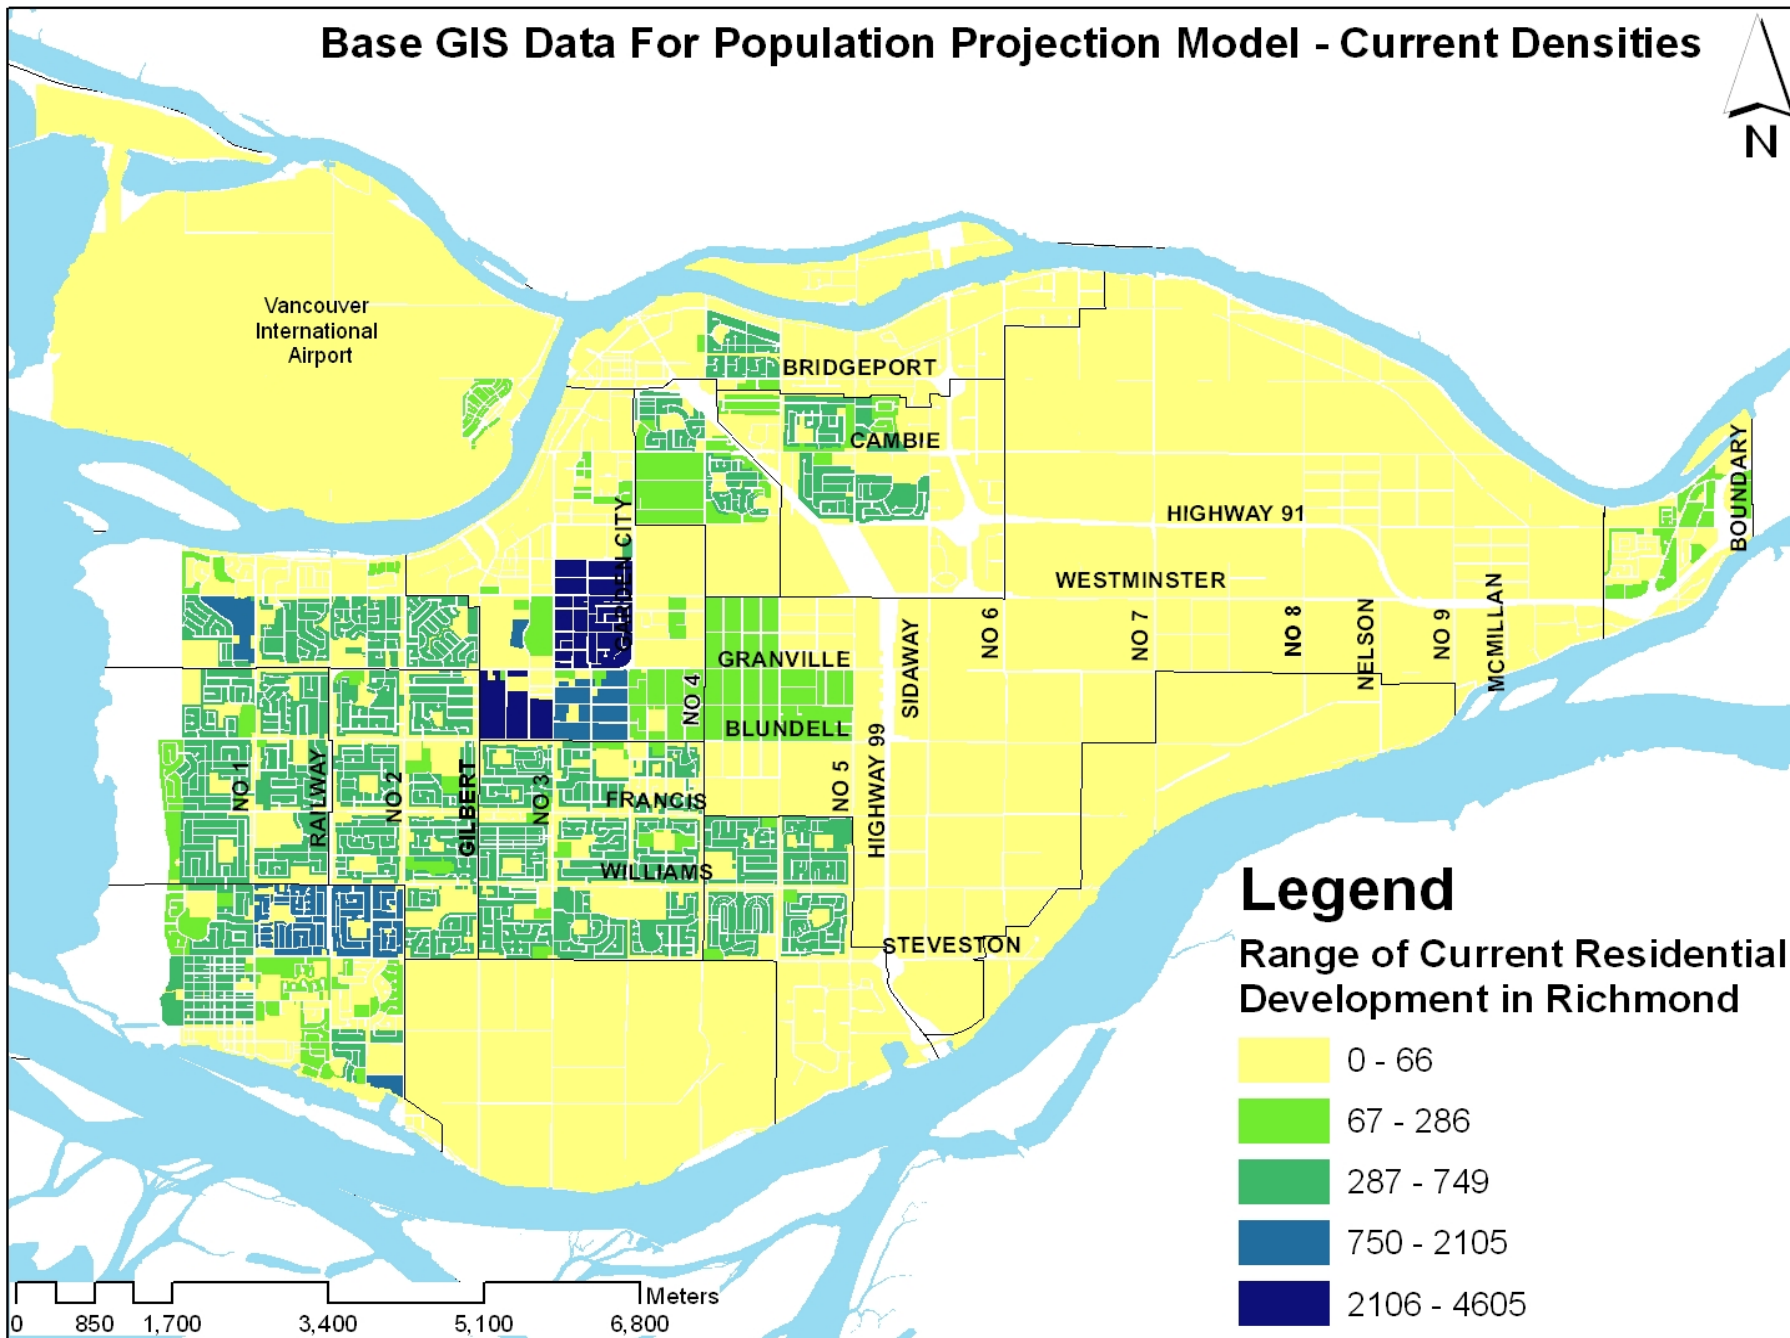

# Estimates of UPA and PPU Figures

Attribute Name	Type of Housing	Area Applied	UPA	PPU
Low Density Single Family	Large lot single family (R1/E), duplexes	Most of the single family neighbourhoods (including arterial properties) (includes an estimate of secondary suites)	3-8	3.0
Medium Density Single Family	Small and medium lot single family (R1/A,K & B)	Some single family neighbourhoods where there are some small lots (Ash Street, Marrington, Steveston)	9-15	3.1
Medium Density Arterial Redevelopment	Small lot single family, medium density townhouses, duplexes, coach houses	Areas along arterial roads where we have seen some redevelopment	9-18	2.7
Medium Density Townhouse	Townhouse	Areas in the City Centre and some parts of West Richmond where there are townhouse developments	15-25	2.5
High Density Apartment	apartment	Areas in the City Centre where there are apartments	25-50	1.5

# *Objectives and Process*

- Objective
  - To estimate Low and high population projections for 2021 (16 years from now correlating to the LRSP) using a map based GIS model.
- Process
  - A GIS shape file is created to represent geographic areas that have housing types that are consistent in terms of type and density.
  - Population figures are calculated by multiplying the area of the shape file (acres) by the density (upa) of the area and the people per unit (ppu) figures by housing type.

# Base GIS Data For Population Projection Model - Current Densities

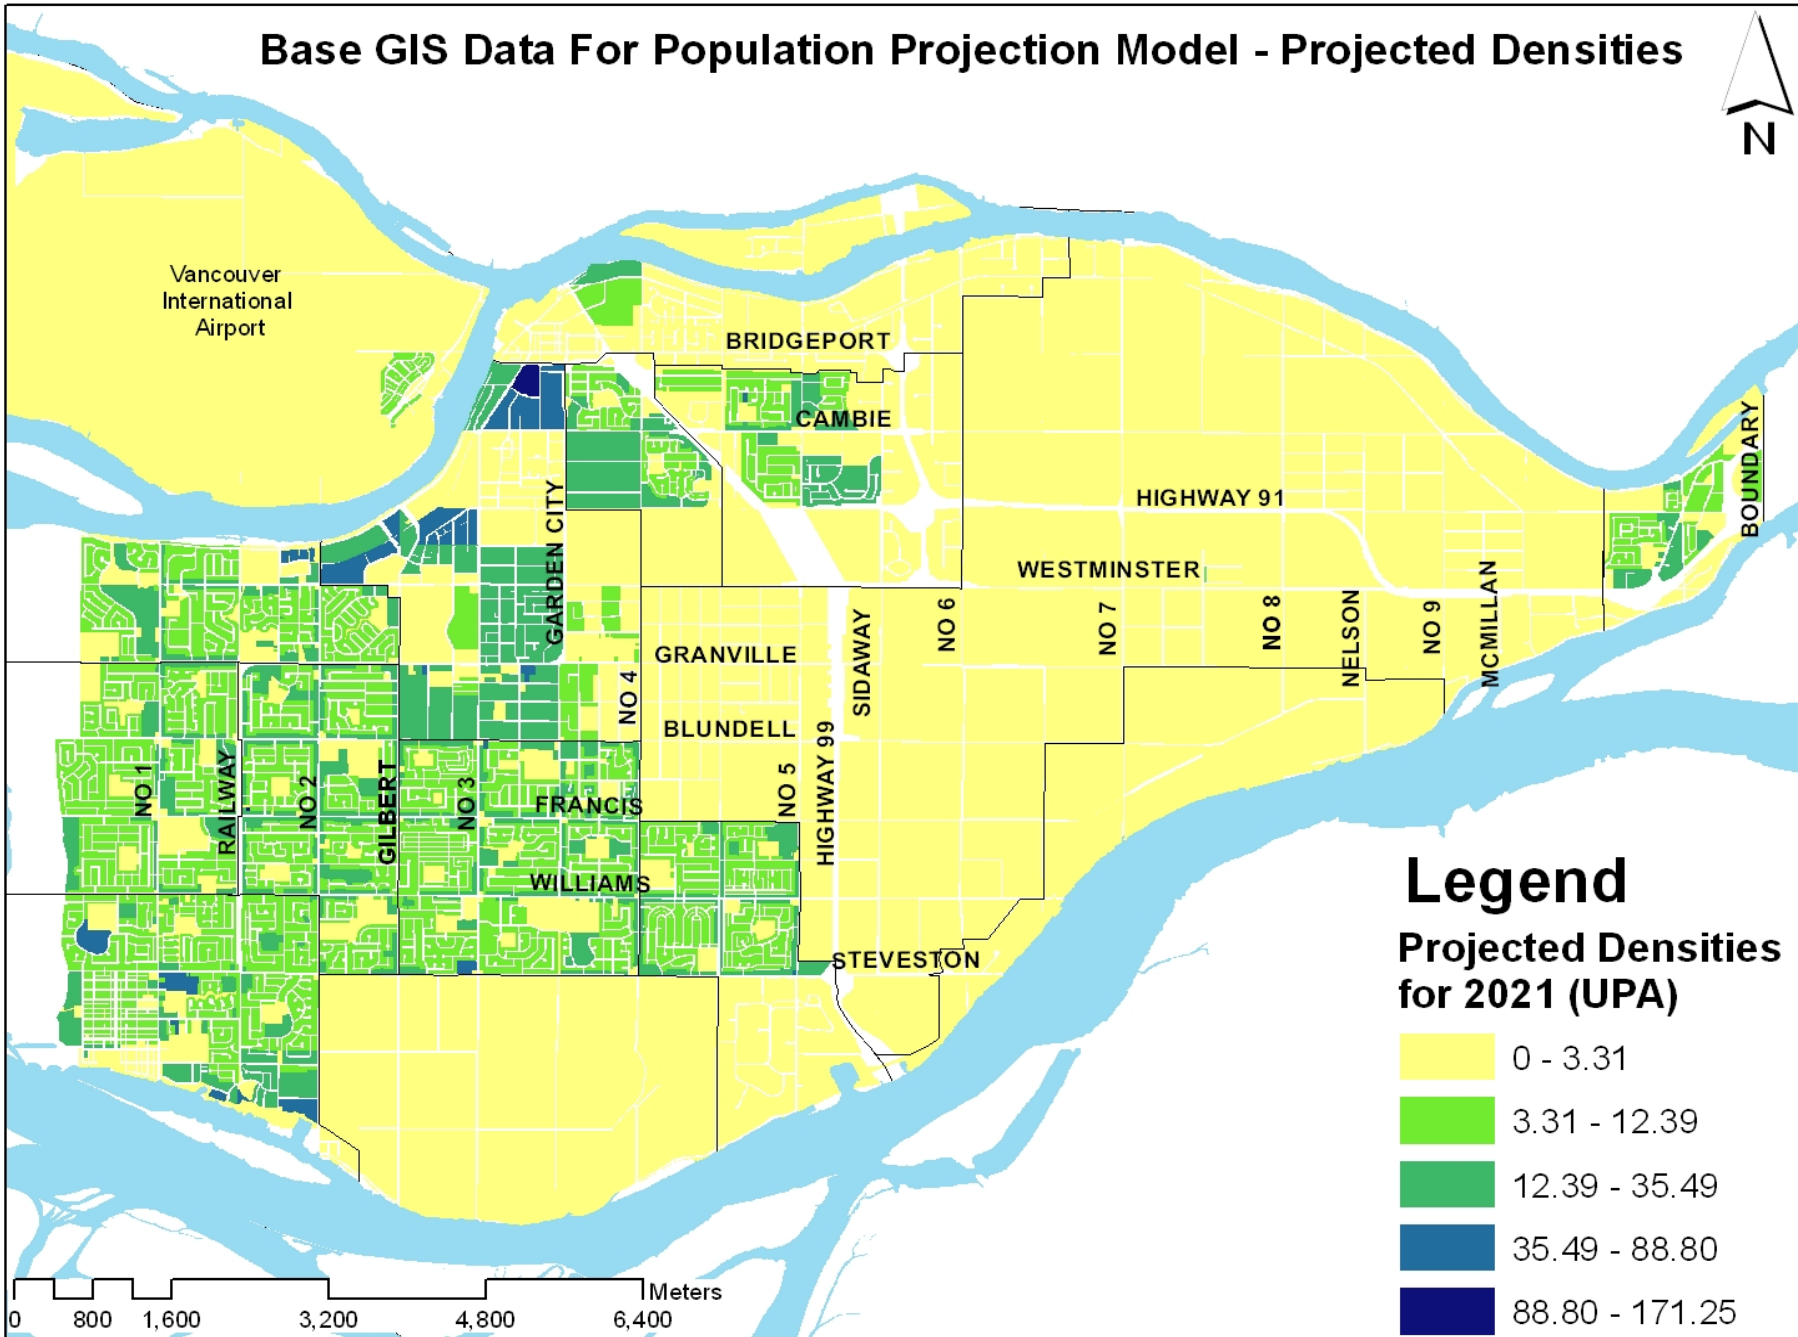

## Legend

Range of Current Residential Development in Richmond

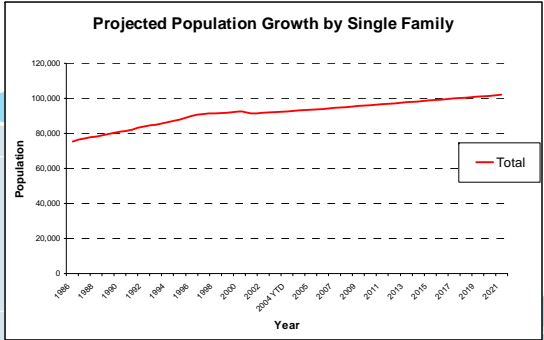

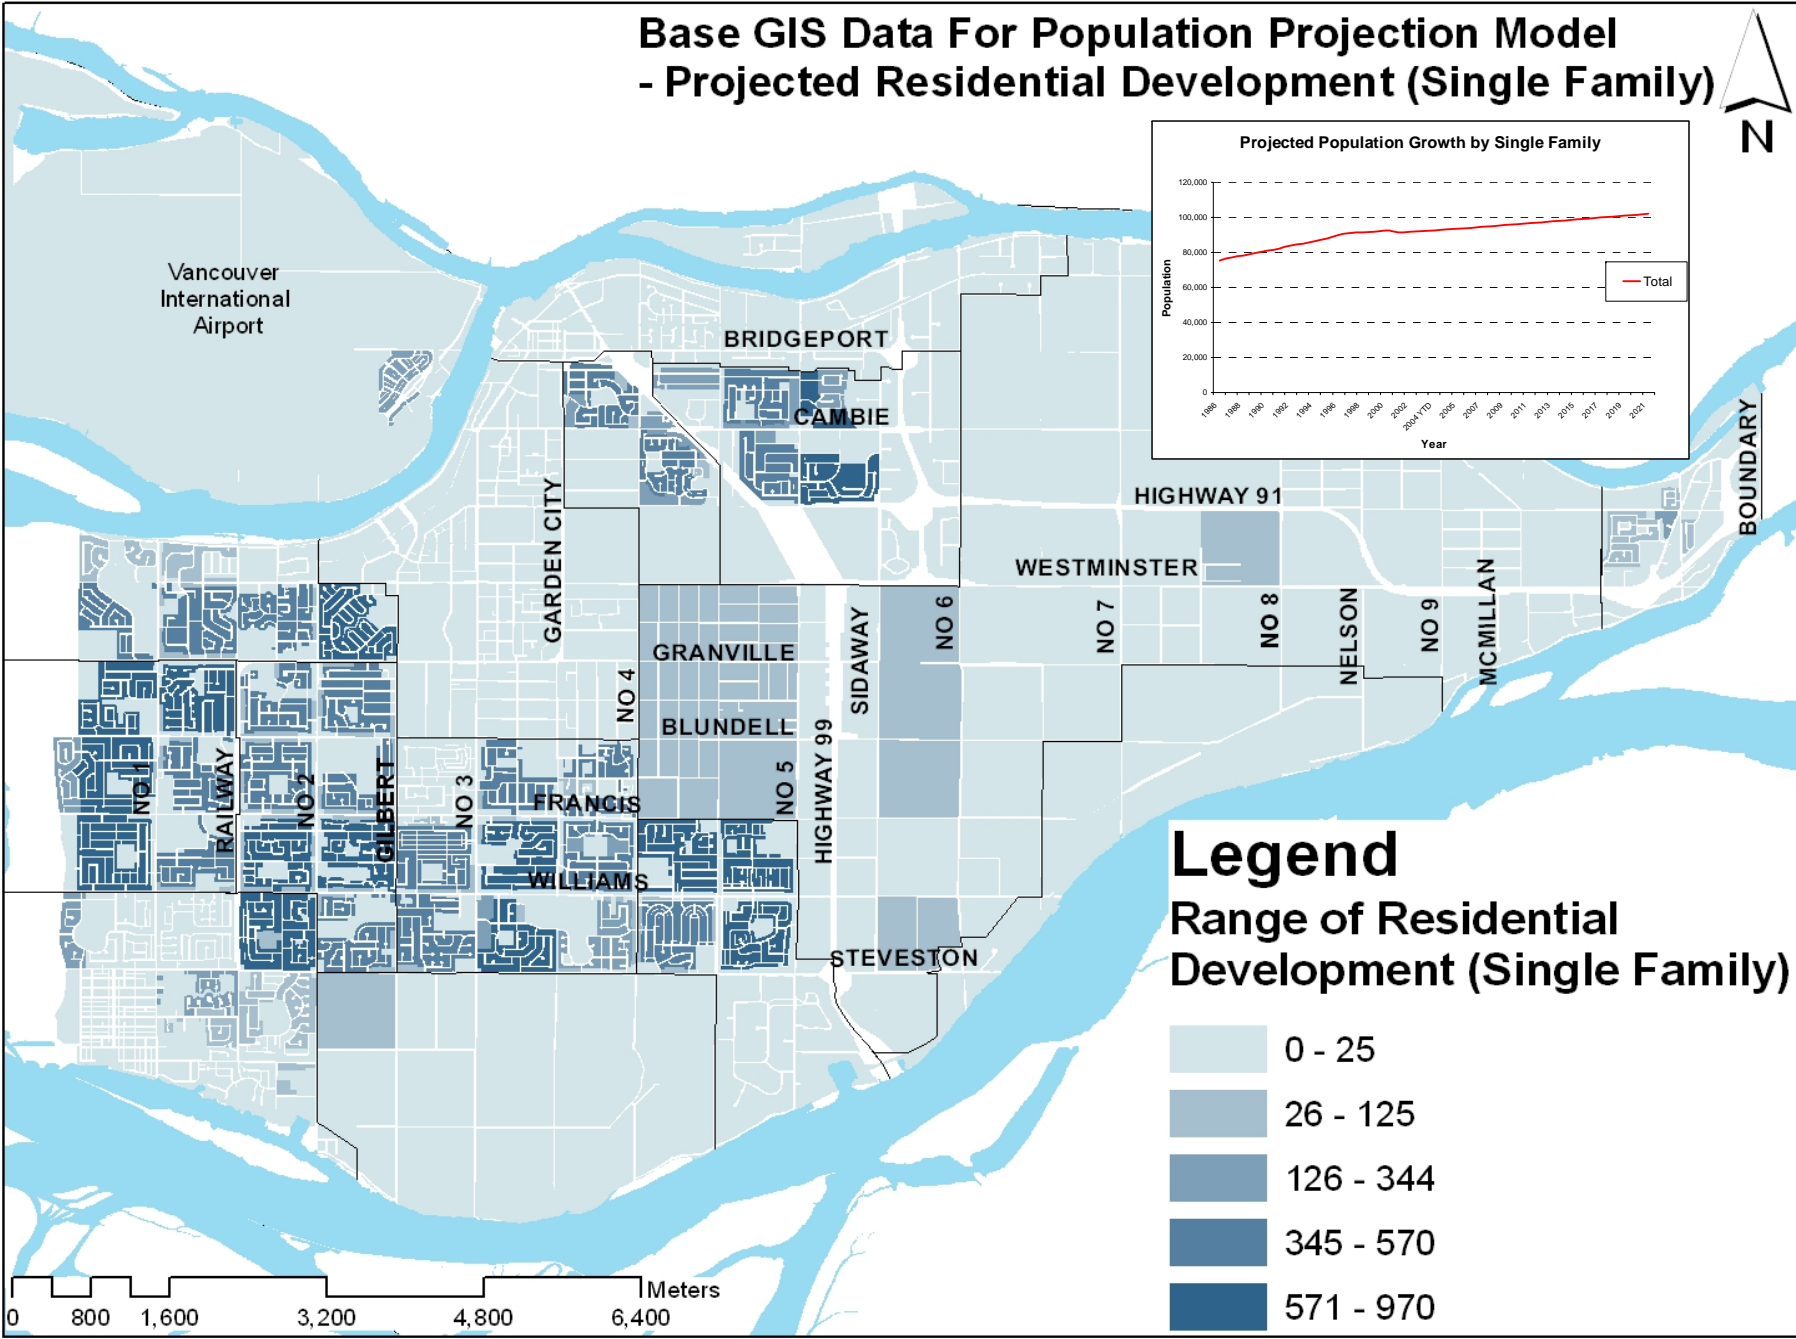

- 0 - 66
- 67 - 286
- 287 - 749
- 750 - 2105
- 2106 - 4605

0 850 1,700 3,400 5,100 6,800 Meters

# Base GIS Data For Population Projection Model - Projected Densities

# Base GIS Data For Population Projection Model - Projected Residential Development (Single Family)

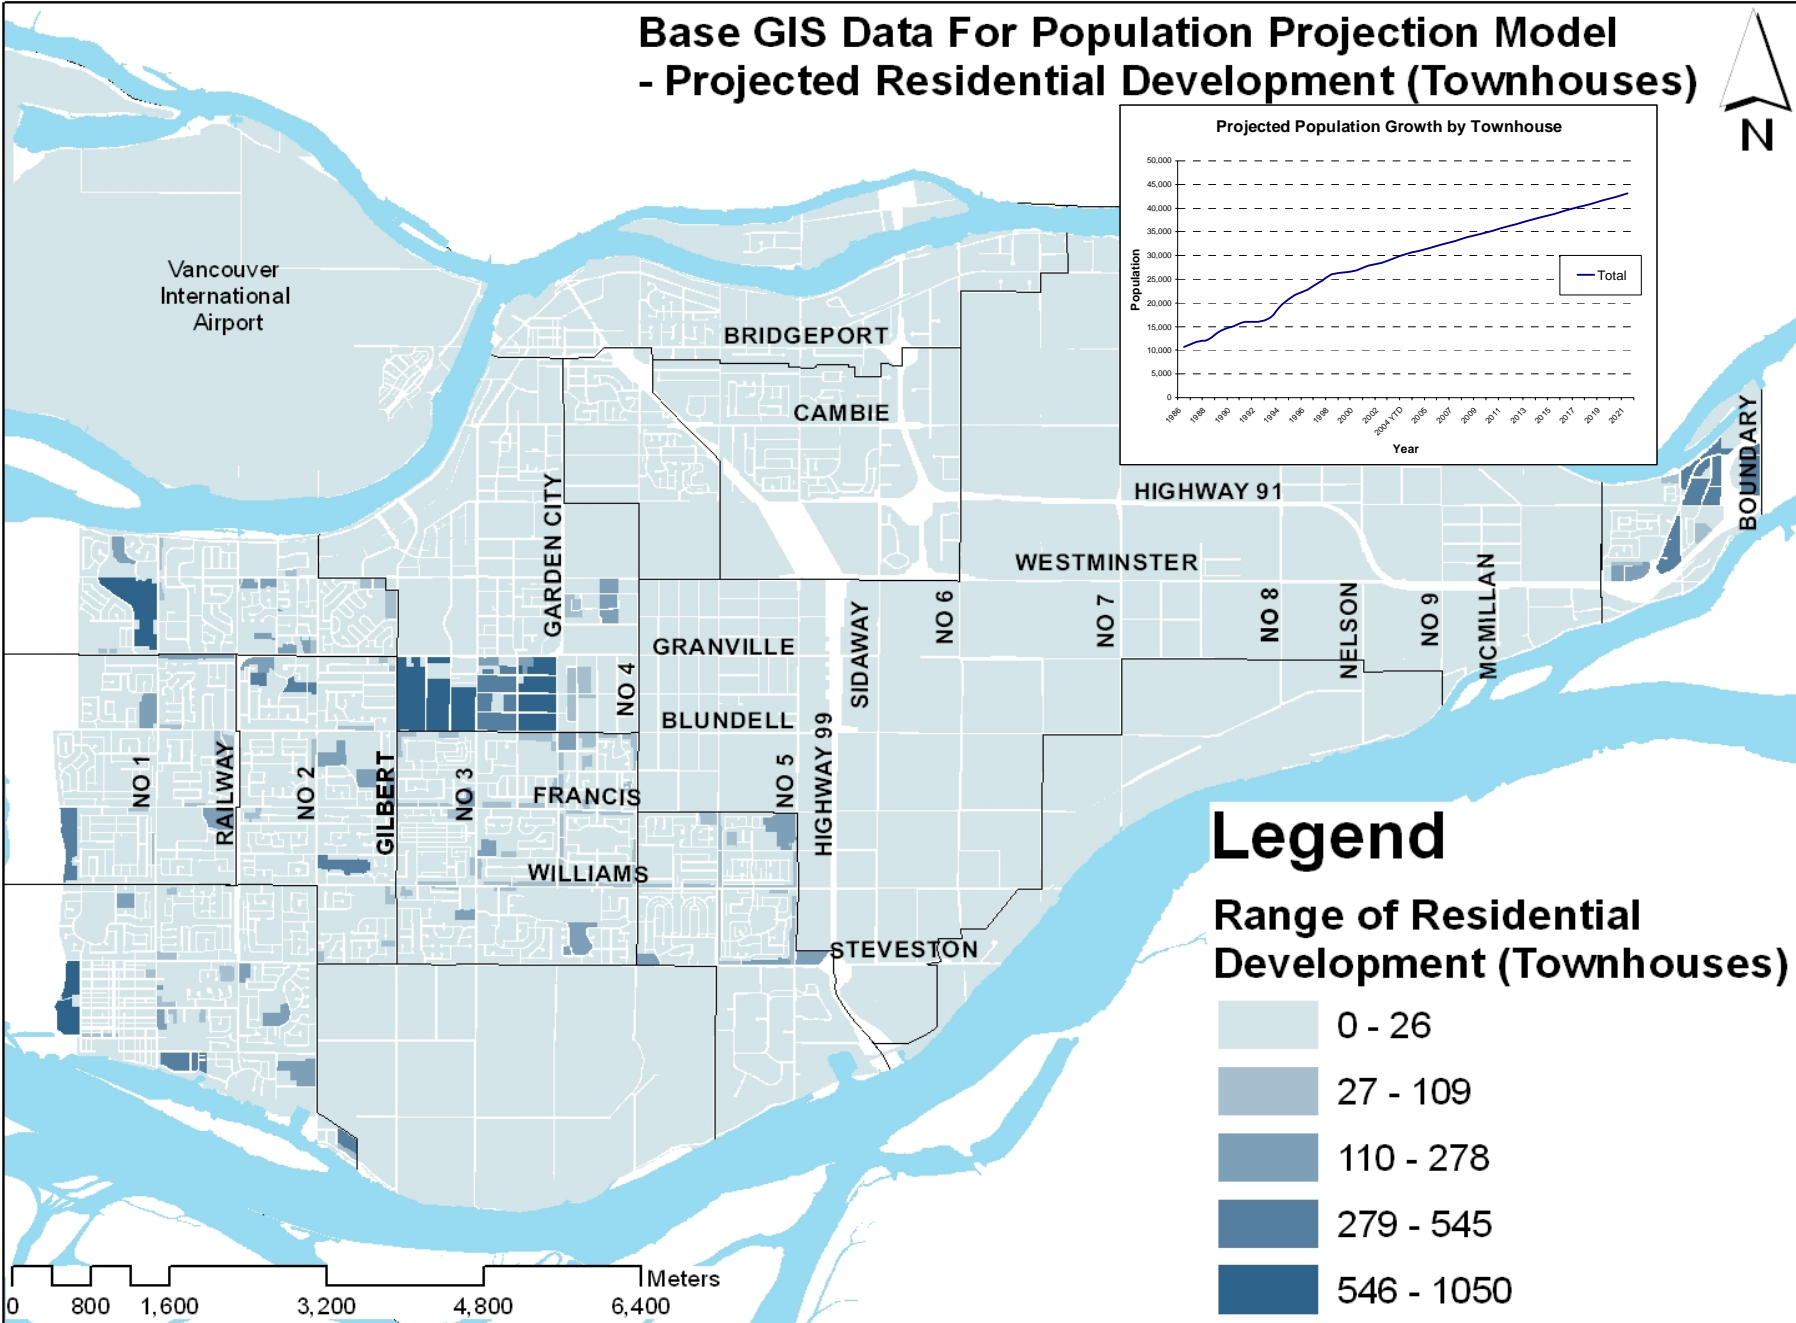

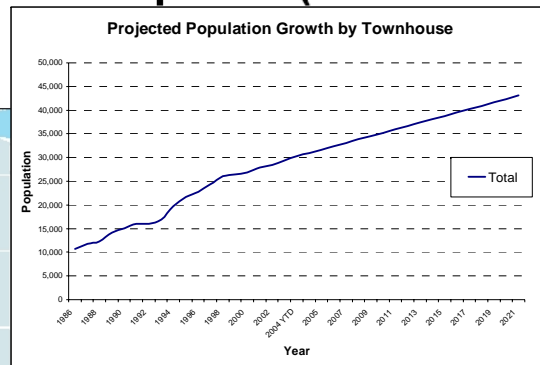

## Legend Range of Residential Development (Single Family)

- 0 - 25
- 26 - 125
- 126 - 344
- 345 - 570
- 571 - 970

# Base GIS Data For Population Projection Model - Projected Residential Development (Townhouses)

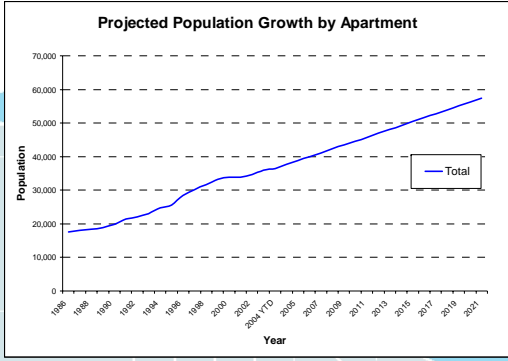

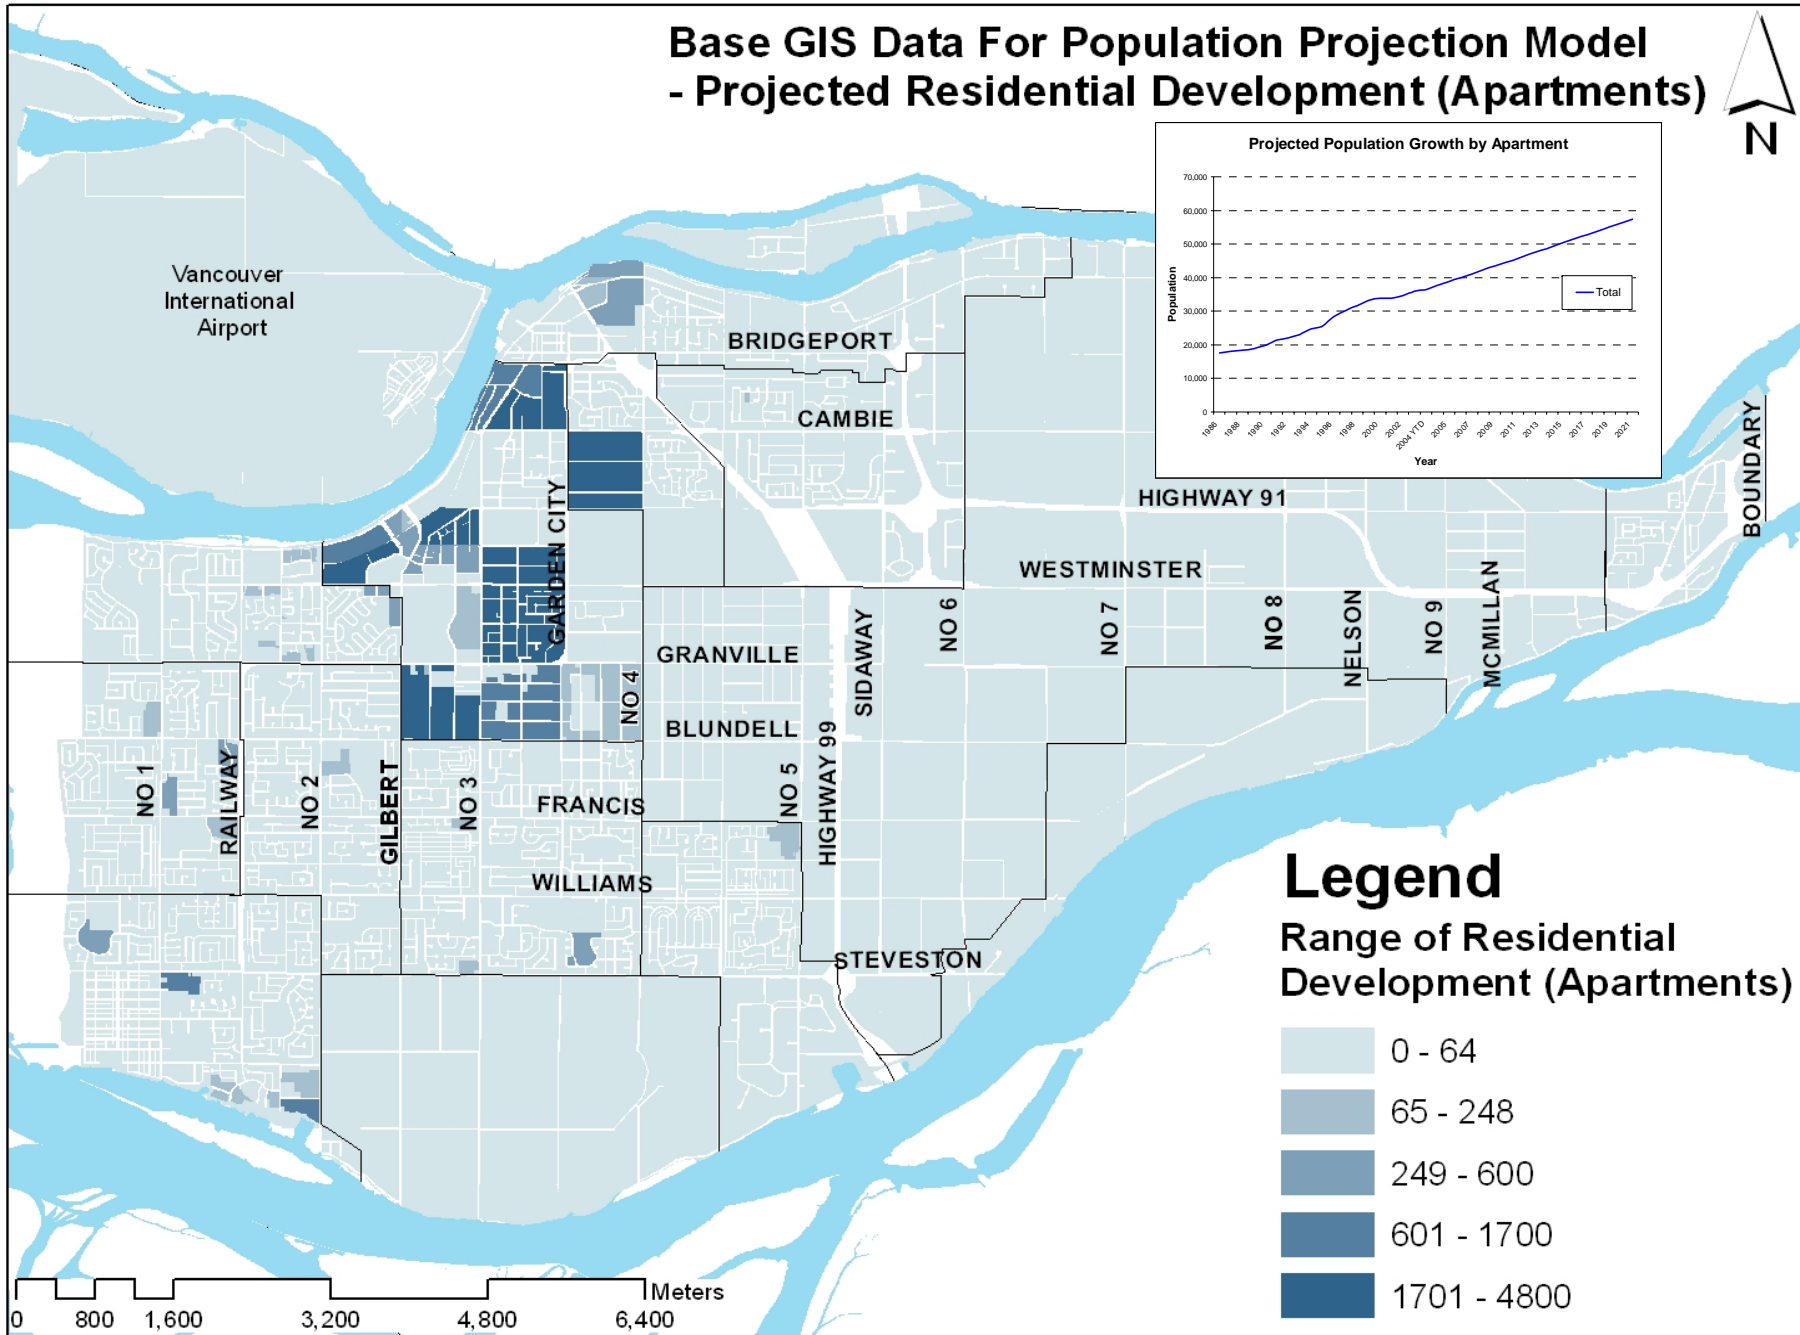

## Legend

### Range of Residential Development (Townhouses)

- 0 - 26
- 27 - 109
- 110 - 278
- 279 - 545

## *Current and Projected Units and Population Within RAV Buffer Zones*

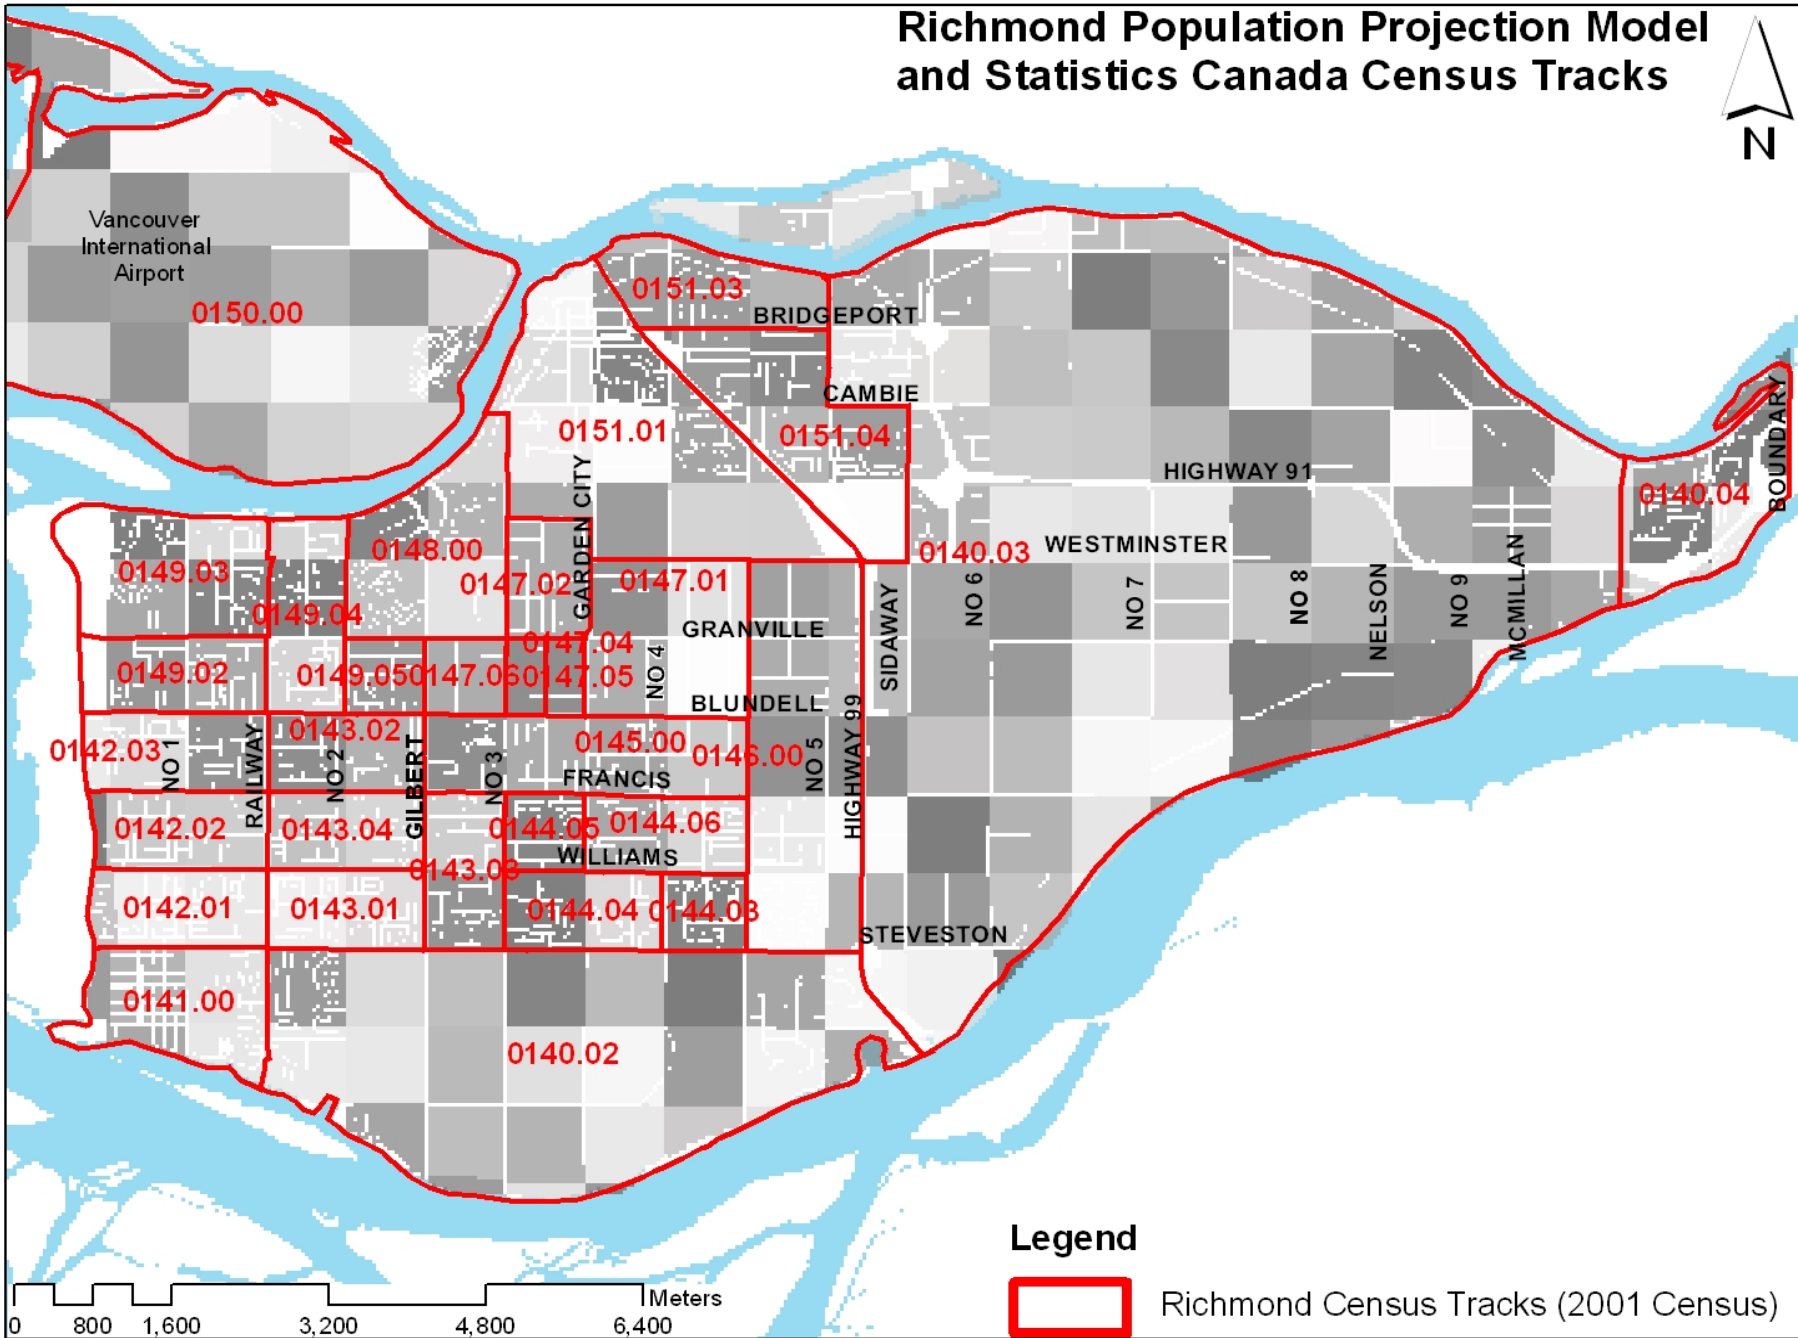

Buffer Zones	Current		Projected	
	Units	Population	Units	Population
250 Metre Buffer	834	1,968	1,048	3,018
500 Metre Buffer	6,190	17,827	13,710	39,484
1000 Metre Buffer	14,528	41,840	23,267	67,008

- 250 metre buffer equals a 5 minute walk
- 500 metre buffer equals a 10 minute walk
- 1000 metre buffer equals a 20 minute walk
- RAV transit stations will receive very little rider-ship outside the 1000 metre buffer zone.

# *Model Output*

# *Future Development*

- Moving to future projection years, housing type and their upa range will change in terms of their geographic areas.
  - For example, Low Density Single Family upa will increase in future years to represent the legalization of secondary suites.
  - Additionally, the people per unit figures will also likely decrease.
  - Development along major arterial roads will increase as densification takes place.
    - Single family housing will be replaced by higher density townhouse development.
  - The City Centre will see a significant increase in multi-family development.
    - The bulk of this development will be apartment high-rise development.
