**Work Order # 2000494 SAN Flush - Mainline**

Entity Type: SANMANS  
 Number: 2000494  
 Priority: 2 - Within 24 Hours  
 Status: Open  
 Acquired By: GRIFFIN, KELLEY  
 Supervisor: [blank]  
 Projected Start/Finish: 04/06/2007  
 Completed By: [blank]  
 Actual Start/Finish: [blank]  
 Units Accomplished: [blank]

**crewsheet v0.6 - Microsoft Internet Explorer**

**The City of Surrey  
Sanitary Sewer System Infrastructure Maintenance Report**

Reported to end of Last Elemental Reg

Section	Descriptions	Unit	Existing	New
1.0 Sewer System Inventory	100 mm service laterals	ma	86,190	9,964
	>100 mm service laterals	ma	1,152	161
	Amount of granly sewers	m	1,366,000	75,260
	Number of manhole/cleanout	ea	16,580	1,315
2 Sanitary Sewer Overflows				
2.2 CCTV of sewers				
2.2.1 Structural Condition

## Custom Utilities

# Integration

Gary Harms  
 Application Integration Architect  
 Information Technology Division

# What is Integration?

The orchestrated sharing of data between applications within the enterprise.

- Cityworks is inherently integrated with GIS
- Remaining integration custom built

# Why Automate Integration?

- Reduce manual intervention with its associated effort and risk of error
  - Enter data as close to the source of origin as possible to make available to all as soon as possible and to reduce error
  - Enter data once to avoid reconciliation of multiple systems
  - Enter data once to avoid effort associated with duplicate entry
- 
- ❖ Reduce manual effort & error
  - ❖ Availability of data

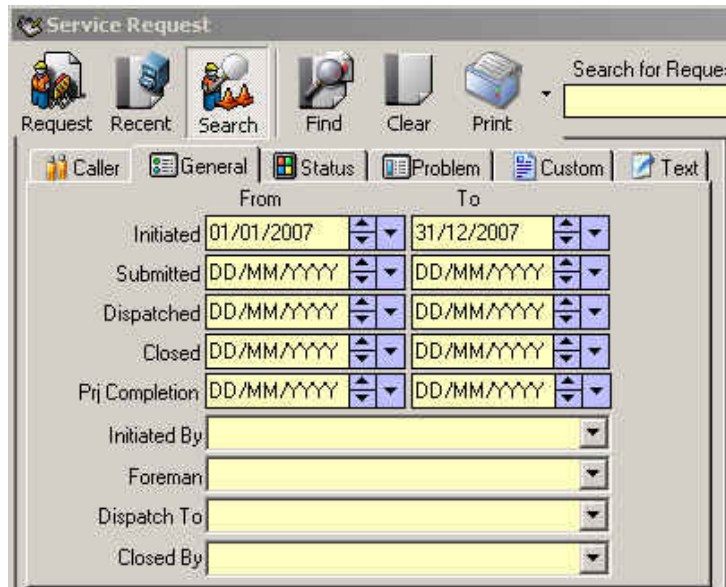

# Cityworks GIS Integration

**Determine the # of reported water main breaks in 2007 and plot the locations**

# Cityworks GIS Integration

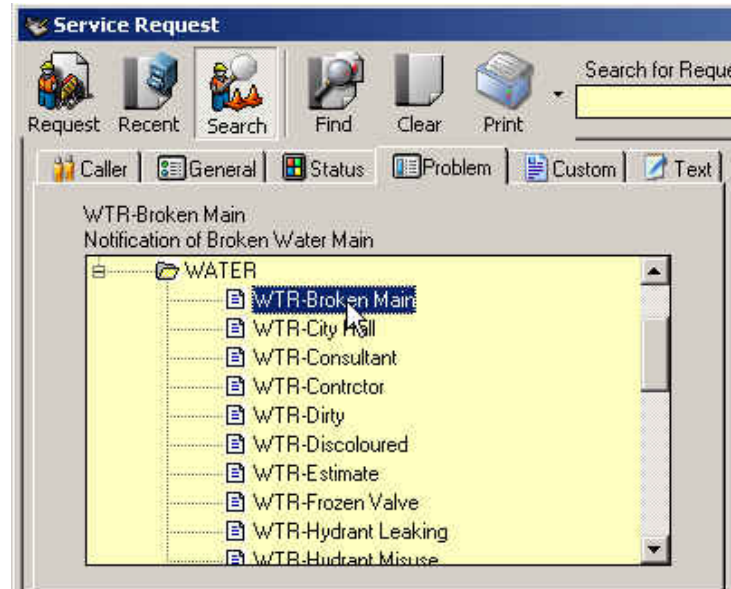

Enter date range

The screenshot shows the 'Service Request' form with the 'Problem' tab selected. The 'From' and 'To' date fields are set to '01/01/2007' and '31/12/2007' respectively. Other fields include Submitted, Dispatched, Closed, and Prj Completion, all with date pickers. Below these are dropdown menus for Initiator, Foreman, Dispatch To, and Closed By.

	From	To
Initiated	01/01/2007	31/12/2007
Submitted	DD/MM/YYYY	DD/MM/YYYY
Dispatched	DD/MM/YYYY	DD/MM/YYYY
Closed	DD/MM/YYYY	DD/MM/YYYY
Prj Completion	DD/MM/YYYY	DD/MM/YYYY

Enter problem

The screenshot shows the 'Service Request' form with the 'Problem' tab selected. The problem description is 'WTR-Broken Main' and 'Notification of Broken Water Main'. A tree view on the right shows a hierarchy starting with 'WATER', which contains a sub-category 'WTR-Broken Main' that is currently selected. Other categories include WTR-City Hill, WTR-Consultant, WTR-Contractor, WTR-Dirty, WTR-Discoloured, WTR-Estimate, WTR-Frozen Valve, WTR-Hydrant Leaking, and WTR-Hydrant Misuse.

WTR-Broken Main  
Notification of Broken Water Main

- WATER
  - WTR-Broken Main
  - WTR-City Hill
  - WTR-Consultant
  - WTR-Contractor
  - WTR-Dirty
  - WTR-Discoloured
  - WTR-Estimate
  - WTR-Frozen Valve
  - WTR-Hydrant Leaking
  - WTR-Hydrant Misuse

# Cityworks GIS Integration

## Save as Event Layer

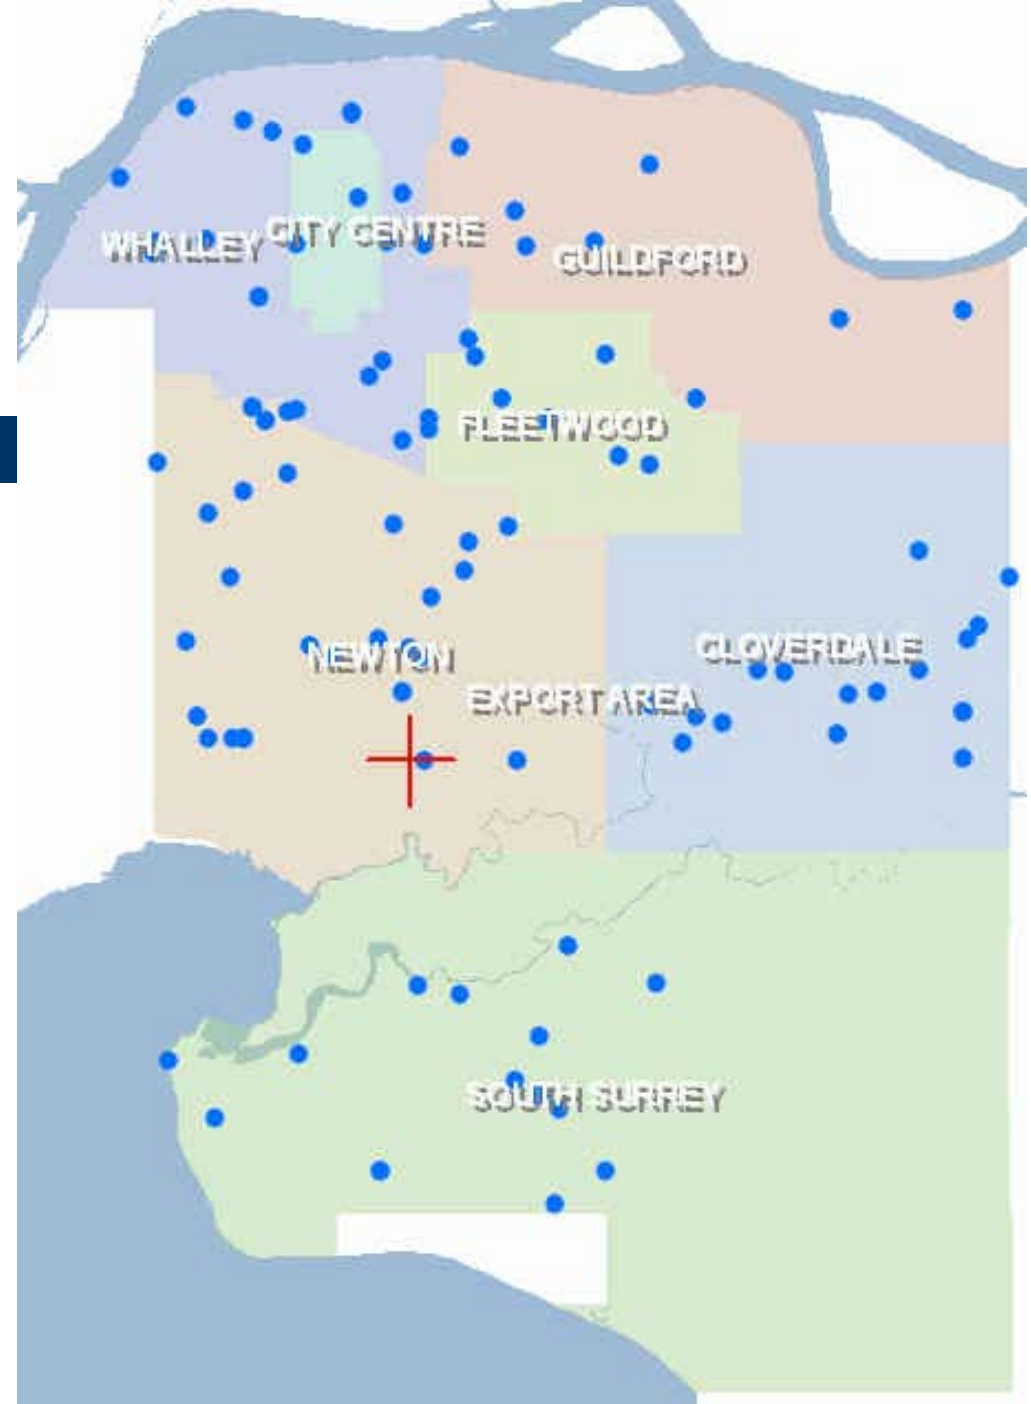

## Define Event Layer in GIS

## Plot the results

- Previously 1-2 months elapsed time.
- Currently 15 minutes.

# # 13

## Triskaidekaphobia

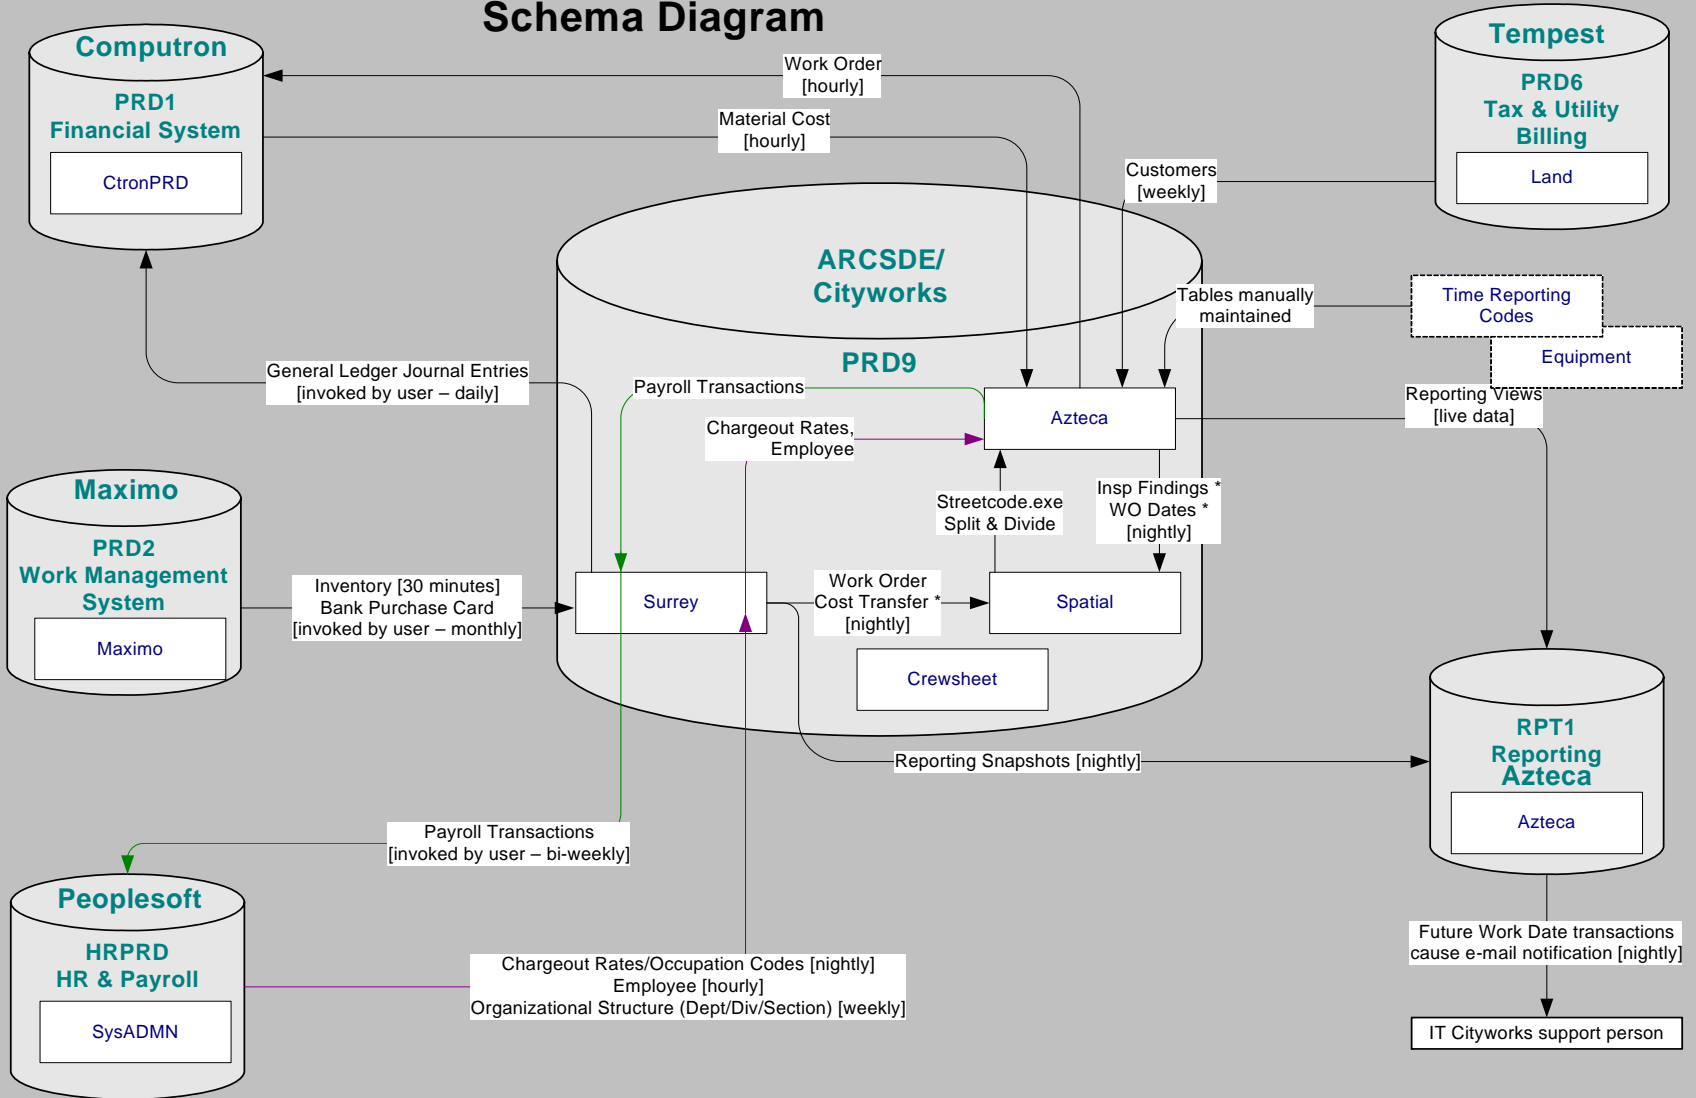

- Fear of the number 13
- from Greek tris=three, kai=and, deka=ten

# System Integration

- Human Resources & Payroll (PeopleSoft)
- City Work Management (Maximo)
- Financial Information System (Computron)
- Tax & Utility Billing (Tempest)
- GIS (ESRI)
- Only SS - volumes will increase
- 13 points!

# Cityworks Integration Overview Schema Diagram

Created: September 19, 2006  
 Created by: Andrew M, Gary, Lou, Teresa  
 Updated by: ASmith - Mar 15, 2007

\* The Transfer Inspection Findings, Transfer WO Dates and Work Order Cost Transfer apps are run on machines in GIS Dept

NOTE: Detailed integration diagrams are available.

# 1. Organizational Structure

- Department, Division and Section changes
- Updated weekly
- Low volume

## 2. Employee Information

- Employee information changes
- Updated hourly
- Low volume

# # 13

## Triskaidekaphobia – Origin?

- Arises from the counting method of ancient people who counted on ten toes and two feet.
- Anything beyond that countable dozen was unknown and thus evil.

# 3. Charge out Rates

- Calculated from pay rates and overhead %
- Updated nightly
- Low volume

## 4. Payroll Transactions

- Labour transactions entered daily via Crewsheet (custom Cityworks entry module)
- Loaded into Payroll bi-weekly
- Average 2200/month

# 5. Inventory

- Inventory issues & returns entered in Maximo
- Updated hourly
- Average 100/month

# # 13

## Triskaidekaphobia – Origin?

- At the Last Supper, Judas, the disciple who betrayed Jesus, was the 13th to sit at the table, thus 13 is considered to carry a curse

## 6. Bank Purchase Card

- Loaded monthly from bank to Maximo
- Transactions for Cityworks work orders flow to Cityworks
- Average 3/month, will increase

## 7. Material Costs

- Purchase Orders, Accounts Payable Invoices and G/L Journal Entries
- Loaded hourly
- PO 25/month, A/P 250/month, JE G/L 40/month

# # 13

## Triskaidekaphobia – Origin?

- On Friday October 13, 1307, King Philip IV of France arrested and murdered the Knights Templar
- Knights Templar – fighting unit founded during the Crusades to ensure the safety of Europeans who made the pilgrimage to Jerusalem after its conquest.

## 8. G/L Journal Entries

- Labour, Equipment and Material (entered via Crewsheet)
- Updated daily during Finance end-of-day processing
- Labour 2200/month, Equipment 1000/month

## 9. Work Order #

- New WO #s (used to validate WO# in Computron)
- Work Order status changes (i.e closed)
- Updated hourly
- 400/month

# 10. Customer Information

- Property Owner names, addresses and garbage collection customer status
- Updated weekly
- Volume?

# # 13

## Triskaidekaphobia – Origin?

- Who knows!

# 11-13 GIS Integration

To allow non-Cityworks users access to

- cost,
- inspection, and
- activity dates

via internal COSMOS or GIS tools

# 11. Asset Maintenance Costs

- Cost transactions are pro-rated across each asset assigned to a work order and added to LTD and YTD accumulators in GIS
- Updated nightly
- 70,000/month – each cost split across all assets on WO

## 12. Work Order Dates

- Work order finish date
- Updated nightly
- 100 per month

# 13. Inspections

- Transfers inspection findings
  - Physical attributes (diameter, material)
  - Asset condition information
- Updated nightly
- 100 per month

# Non-Integration Points

- Time Reporting Codes
  - very low volume (1 since go live)
- Equipment
  - limited volume

# # 13

Regardless of its origin this fear manifests itself today

- In North America many tall buildings do not have a floor numbered 13
- On some passenger aircraft there is no seating row numbered 13
- In Formula One no vehicle carries the number 13
- Feb 2007 - a Belgian carrier, Brussels Airlines, was forced to change its logo following complaints from superstitious passengers

# # 13

*British Medical Journal* 1993

"Is Friday the 13th Bad for Your Health?"

Consistently fewer people chose to drive their cars on  
Friday the 13<sup>th</sup>

however,

the number of hospital admissions due to vehicular  
accidents was significantly higher than on "normal"  
Fridays.

# Integration Methods

Gary Harms

# Integration Methods

- Uses database triggers to populate interface tables
- Interface tables reside in the database that initiates the transaction
- Destination application pulls the data from the interface table
