

[HARTerra Spatial Solutions Ltd.](#) is seeking individuals or small firms that are in a position to sub-contract on various Geographical Information Systems (GIS) implementation and support contracts. This would be short-term (1 to 6 months in length) but may work into longer term for the right person and as work is available.

Desired skills and abilities include the following:

- Experience with esri ArcGIS Desktop and Server tools.
- Experience with Feature Manipulation Engine (FME) &/or esri Data Interoperability extension.
- GIS development experience with Python, specifically arcpy.
- Enterprise SQL database experience.
- Esri Enterprise Geodatabase experience with schema design and change management including versioning workflows.
- Experience in GIS processes and associated data related to infrastructure and local government.
- Experience with data migration, quality control and spatial data management.
- Data updates and maintenance.
- Individual or firm must reside in Canada.

HARTerra Spatial Solutions Ltd. is a GIS company based out of Castlegar, BC. We provide various GIS services to utilities, local government, resource sector, and related industries. We are always looking to work and collaborate with experienced and like-minded individuals from the southern interior or western Canada on projects. If you are a GIS Tech nerd and are looking for new challenges, we want to talk to you.

For more information, or if you are interested in applying, please submit a resume(s) and cover letter describing your experience, background, other company or consulting details, description of firm, standard rates and fees, availability, relevant hardware and software, and insurance coverages to info@harterra.com by October 15, 2021.
