

Where ideas work

## **Ministry of Energy, Mines and Low Carbon Innovation**

Currently there is one 1 permanent opportunity available in Prince George.

### **Regional Geologist**

**\$68,008.54 - \$85,592.73 annually**

The Regional Geologist is responsible for keeping abreast of current metallogenic studies and syntheses, developing and reviewing genetic mineral deposit models, reviewing and advising on mineral/coal/aggregate development proposals, maintaining detailed, accurate and current databases of mineral resources/coal, exploration activity and comprehensive mineral deposit files, providing advice and instruction to mineral explorationists, prospectors, First Nations, public and potential developers and generally fostering and representing the Ministry's interest and objectives.

The Regional Geologists are part of the Vancouver-based BC Mineral Development Office, a section of the BCGS, and works in, and closely with their regional office staff. This position is one of five Regional Geologists, is based in Prince George, and is the Regional Geologist for the North Central and Northeast mining regions.

### **Qualifications for this role include:**

- Undergraduate degree or higher in Geology or Geological Engineering from a university of recognized standing.
- Minimum of 3 years' experience in mineral exploration, mining geology or government geosciences.
- Registered or immediately eligible\* for registration, as a Professional Geologist with the Engineers & Geoscientists British Columbia.  
\*Note: Immediately eligible is defined as being registered as a professional Geologist in another Canadian jurisdiction and able to transfer that membership to the EGBC within 6 months of employment. It is the responsibility of the applicant to have the EGBC review their qualifications to ensure they have the necessary requirements for registration.
- Experience with a broad range of computer software such as MS Office, GIS, graphics packages, MapPlace, and other databases to produce geological and mineral potential maps and displays materials.
- Experience conducting field work.
- Experience analyzing, evaluating, and organizing data.
- Experience working independently/autonomously and making decisions and judgments.
