## Ministry of Energy, Mines and Low Carbon Innovation

This position is based in Victoria and has on-site office based requirements

### Geomatics Geoscientist

**\$68,008.54 - \$85,592.73 annually 3% Recruitment and Retention Adjustment plus additional annual 7% Overtime Shift Standby (OSS) provision**

The British Columbia Geological Survey has a long tradition as the oldest scientific organization in the province. The Survey conducts research to establish the geological evolution and mineral resources of the British Columbia. This position is based in Victoria, central to a vibrant geological community, which includes the University of Victoria and, immediately north of Victoria, the Pacific Geoscience Centre of the Geological Survey of Canada. The Survey serve as custodians of all public geoscience data in the Province and creates innovative solutions to manage and distribute British Columbia's geoscience information. Access to reliable data attracts investment and is essential for evidence-based decision.

The Geomatics Geoscientist maintains geoscience databases and applications to develop data products, maps, and interoperable web services. The position also provides expert advice in support of land use planning, mineral exploration, and public geoscience.

A less qualified applicant may be considered for appointment at a lower level as an under-implemented position until the employee gains the experience, knowledge, and skills needed to reach the full working level of this position. The BCGS will provide or support the required training.

### Qualifications for this role include:

- Registered or immediately eligible for registration, as a fully licensed Professional Geoscientist with the Engineers and Geoscientists of BC.

**Note:** Immediately eligible is defined as being registered as a fully licensed Professional Geoscientist in another Canadian jurisdiction and able to transfer that membership to the EGBC within 6 months of employment. It is the responsibility of the applicant to have the EGBC review their qualifications to ensure they have the necessary requirements for registration.

- Master's degree or higher in earth science or related field and a minimum of 2 years related experience\*; OR
- Bachelor's degree in earth science or related field and a minimum of 4 years related experience\*.

\*Related experience must include mineral exploration, mining geology, geological mapping, or related, of which a minimum of two years has been in Canada.

- Experience with GIS tools, database systems, and graphic packages to produce geological maps and data products.
- Experience in interpersonal, oral and written communication and presentation skills to technical audiences.
- Experience in the compilation, evaluation, and interpretation of geology, mineral resources, mineral deposits, geochemistry, or Quaternary geology.
