

Where ideas work

Ministry of Forests, Lands, Natural Resource Operations and Rural Development

A temporary opportunity for approximately one year is currently available.

This temporary opportunity can be performed from any of the Ministry's provincial district offices.

GIS Analyst

\$60,998.61 - \$69,422.06 annually

The Ministry of Forests, Lands, Natural Resource Operations and Rural Development has a mandate to manage specified Crown land and resources in a manner that embraces the economic, environmental, and social goals of government. These results are all essential to improving the global competitiveness of BC industry and our ability to attract private investment and to stimulate economic growth and job creation across the province.

In this position you will conduct advanced spatial data analysis in support of program and management decision making on resource planning, land management or other program issues. This role provides expert advice to clients, business area staff, contractors and business area specialists in the initiation, design, and specifications of projects, types of source data required and available, data base structure, limitations, and related specialized applications.

Qualifications for this role include:

- Degree in Geographic Information Systems (GIS), Geography, Computer Science, Resource Management, or related field **and** 1 year of relevant experience (gained within the last 4 years); **OR**,
- Technical Diploma in GIS **and** 2 years (gained within the last 5 years) of relevant experience; **OR**,
- An equivalent combination of education, training and/or related experience may be considered.

Relevant experience **must** include:

- Minimum of 2 years of experience using ESRI ArcGIS 10.x for spatial analysis, cartography, and data management.
- Experience in managing and implementing geospatial projects, providing geospatial solutions, and delivering complex analysis projects in support of clients' business needs.
- Experience consulting or providing expert geospatial advice to non-technical people (clients, decision makers, technical and professional staff) and in ensuring the provision of technical products that meet the needs of natural resource clients and users.
- Experience in automating GIS workflows using python scripting.
