Geospatial Services Analyst

\$60,998.61 - \$69,422.06 annually plus \$47.83 bi-weekly isolation pay for Fort Nelson.

The Geospatial Services Analyst, from a geospatial perspective, supports the complete workflow of a wide variety of authorizations, ensuring data quality, consistency, timely processing, and knowledge of proprietary software applications. This role conducts spatial data analysis, creates digital graphic and descriptive products in support of management decision making on resource planning, land management or other program concerns. The geospatial services you provide form the core of the evidence-informed expert advice for delivering timely and durable decisions on the land base for British Columbia.

The BC Public Service is an award winning employer and offers employees competitive benefits, amazing learning opportunities and a chance to engage in rewarding work with exciting career development opportunities. For more information, please see [What We Offer](#).

Qualifications for this role include:

- Diploma or higher education in Geographic Information Systems, or in a natural resource related discipline (e.g. Geography, Forestry, etc) plus recent related experience; **OR**
- An equivalent combination of education, experience and training may be considered.

Related experience may include all of the following:

- Experience capturing, converting, creating, editing and maintaining digital information in a GIS environment.
- Experience designing and developing customized spatial applications and preparing recommendations based on natural resource interpretations.
- Experience delivering a variety of spatial analysis projects in support of client's business needs
- Experience generating high quality, reliable products to support robust resource management decisions, including summary statistics, reports, and map products
