

GIS ANALYST

BURNABY, BC

The Role

We are looking for an innovative and accountable **GIS Analyst** with a passion for delivering the right solution to serve each client's unique needs. You take pride in your work and build trust by following through on your commitments to your clients, partners, and colleagues. You need to have a say in what the world looks like, create sustainable and environmentally responsible solutions, and contribute towards healthy economies while making a lasting positive impact on society. In addition, you want to be part of a company culture that focuses on effectively growing and applying your marvelous talents.

The Company

We are a 100% employee-owned consulting engineering firm, but we are also more than that. Our diverse crew includes engineers, technologists, biologists, agrologists, planners, scientists, and more. We began in 1975 and work together in an environment that empowers us to think differently about real-world problems. We want to work with those who, like us, take pride in creating **INNOVATIVE** solutions that push the boundaries of conventional practices.

In addition, we seek opportunities for continuous improvement in our work and support those who have a passion for **EXCELLENCE**. Here, we care about each other and strive to create a fun, open and engaging environment that leverages our individual strengths and encourages vibrant discussion.

What You'll Do

- Implement and maintain KWL and its clients' ArcGIS Enterprise and ArcGIS Online infrastructure
- Perform spatial and non-spatial analyses and reporting
- Design, build, and manage GIS spatial databases for KWL and its clients
- Assist with project work in various corporate disciplines as required, including core GIS tasks and asset management projects
- Research available technologies and review corporate practices to identify potential areas for advancement and improvement
- Prepare material for education, marketing, presentations, or technical documentation for dissemination to KWL staff and clients
- Prepare figures for proposals, reports, and award submissions

What You'll Bring

- A positive and motivated personality!
- University degree in Geography or an Advanced Diploma in Geographic Information Systems
- Minimum 3 of years of previous experience. Previous experience working in consulting or with clients is an asset
- Considerable knowledge of GIS and system integration, related software applications and infrastructure technology, including Esri's ArcGIS Web AppBuilder and/or ArcGIS Experience Builder
- Familiarity with ArcGIS Field Maps, Story Maps and Survey123
- Intermediate or better knowledge of ArcGIS Enterprise (Server and Portal), ArcGIS Online organizations, and/or Python scripting
- Familiarity with AutoCAD, Civil 3D, and Microsoft Office Suite
- Excellent interpersonal and communication skills (oral and written) and be able to work with team members in a multi-disciplinary environment
- A desire to learn new skills and an eagerness to grow within your role

- A valid driver's license (in good standing) is preferable
- Must be physically able to conduct field visits commensurate with project work. This may include handling and operation of equipment, travel to remote areas by vehicle, boat, air or foot, and outdoor site visits in all weather conditions on uneven/varying ground terrain.

What We Offer

- Competitive Salary and a generous performance-based bonus
- An opportunity for share ownership on meeting the eligibility criteria
- Excellent benefits, including extended health, dental, vision and health care spending account
- Employee and Family Assistance Program that offers 24/7 support for all employees and their family members via phone or online
- Annual Health & Wellness Allowance
- Ability to create your own work schedule and flexibility for your workday
- Relocation support, if applicable and the ability to work from any of our 5 offices
- Career Coaching program and continuous support for professional development and growth
- An employee-centric culture that includes sports participation, various team memberships, and team building activities
- Direct guidance from experienced teammates and an opportunity to work with an award-winning team
- And more
